RANA AHMAD MUJTABA

ranaahmadmujtaba92@gmail.com | +92 3098420283 | Lahore , Pakistan

LinkedIn: https://www.linkedin.com/in/rana-ahmad-mujtaba-/

SUMMARY Highly skilled **Full Stack Web Developer** with hands-on experience in designing, developing, and deploying dynamic web applications. Proficient in front-end technologies including **HTML, CSS, JavaScript, React**, and modern UI practices, as well as backend development using **Node.js and Express**. Experienced in working with **Firebase**, **Supabase**, and **Neon** for authentication, real-time databases, cloud storage, and scalable backend services. Strong understanding of **responsive design**, **RESTful APIs**, **state management**, and **version control systems** such as **Git**. Passionate about building clean, scalable, and user-friendly digital solutions with a focus on performance and maintainability.

EDUCATION

Bachelor **2022 - 2026**

- University of Lahore, Riwind Road, Lahore, Pakistan
- BSIET(Information Engeerning Technology)

Intermediate **2020 - 2022**

- Goverment College, Railway Road, Lahore, Pakistan ICS
- **Matriculation** **2018 - 2020**
- Latif Education High School, Lahore, Pakistan

KEY SKILLS

Technical Skills:

HTML, CSS3, JavaScript, **React.js** (responsive UI, components), **Node.js & Express.js** (REST APIs), databases including **MongoDB, Firebase, Supabase, and Neon (PostgreSQL)**. Experience with **Redux Toolkit**, **React Router**, authentication, and real-time data handling. Familiar with **Git/GitHub**,and deployment on **Firebase Hosting,**Basic knowledge of **Machine Learning** and **Embedded Systems** (Arduino).

Languages:

- **English:** Fluent (Speaking, Reading, Writing)
- **Urdu:** Native (Speaking, Reading, Writing)

Additional Qualifications:

- **Hafiz-e-Quran** with excellent command over Tajweed and memorization.

EXPERIENCE

Frontend Developer Intern (React JS)

Invosage

- Worked as a **Frontend Developer Intern**, developing responsive and interactive user interfaces using **React JS**.

- Implemented component-based architecture, managed application state, and integrated APIs for dynamic data rendering.
- Translated **Figma UI designs** into functional React components with responsive layouts.
- Handled form validation, event handling, and improved user experience through optimized UI logic.
- Collaborated with the development team to debug issues and enhance performance.

Full Stack Web Development Trainee (React & Express)

Corvit Networks

- Completed professional training in **Full Stack Web Development** with a focus on **React JS and Express.js**.
- Developed full-stack applications by integrating React frontend with Express-based backend APIs.
- Learned and applied concepts of RESTful APIs, authentication, and database connectivity.
- Practiced real-world development workflows, debugging techniques, and clean coding standards.

PROJECTS

- **WiFi Jammer** – Built using Raspberry Pi and Python with packet injection techniques
- **Barbershop Website** – Frontend: HTML, CSS, JavaScript | Backend: Node.js, MongoDB
- **Full Stack Shoes Website** – React.js frontend with Express.js and MongoDB backend, deployed on Vercel
- **Linear Circuit Analysis Project** – Simulated and analyzed linear electronic circuits using Multisim and Proteus, focusing on voltage divider, current calculations, and transient analysis in RLC circuits
- **SQL-Based Student Record System** – Designed and implemented a relational database using MySQL for managing student records, including table normalization, query optimization, joins, views, and stored procedures
- **Basic Electronics Project** – Designed and implemented logic gates, flip-flops, and simple combinational circuits on breadboard using ICs and digital trainer kits for hands-on understanding of Boolean logic and digital electronics fundamentals

- **Laptop E-Commerce Web Application** –
  Designed and developed a full-stack e-commerce website for laptops using **React JS** for the frontend and **Firebase** as the backend. Implemented product listing, dynamic UI rendering, and responsive layouts. Integrated **Firebase Authentication** for user login and signup, **Firestore / Realtime Database** for product and order management, and handled real-time data updates. Connected frontend with Firebase services to ensure smooth and scalable application performance. Here is the link https://laptop-d4659.web.app/

Final Year Project

Full Stack Library Management System - Developed a role-based Library Management System using MERN stack (MongoDB, Express.js, React.js, Node.js). Implemented admin and user dashboards, book issuing/returning features, and OTP-based email verification. Integrated RESTful APIs, JWT for authentication, and used MongoDB for dynamic book and user records. Deployed using Vercel and Render.
