OBJECTIVE

AI/ML Intern with a strong foundation in Artificial Intelligence and Machine Learning, hands-on experience in Python, OpenCV, Keras, CNNs, and RNNs, and familiarity with AWS cloud services and cloud computing concepts. Skilled in developing and training machine learning models and interested in deploying scalable, cloud-based AI solutions. Highly motivated, detail oriented, and eager to contribute to data-driven, production-ready systems in a professional AI environment.

EDUCATION

UNIVERSITY OF ENGINNERING AND TECHNOLOGY TAXILA – Taxila, Pakistan ***2020 - 2024***

Bachelor of Computer Science

Relevant courses: Artificial Intelligence, Machine Learning, Computer Vision, Data Structures & Algorithms, Database Systems, Software Engineering

RASHID MINHAS HIGER SECONDARY SCHOOL

FSc pre-Engineering ***2019 - 2020***

Experience

Forage Academy Data Labeling Job Simulation on Forage - January 2026

- Completed a job simulation where I worked as a Data Labeling Analyst for a hypothetical AI company, reviewing real customer support messages
- Practiced classifying messages for **Intent**, **Sentiment**, and **PII** (personally identifiable information) using a consistent labeling schema
- Evaluated tricky or ambiguous edge cases, and wrote short rationales justifying final label decisions
- Reviewed labeling work done by others, identified inconsistencies, and suggested one improvement to the team's labeling guidelines
- Strengthened my ability to apply clear definitions, follow ethical privacy practices, and maintain consistency across data
- Gained hands-on experience in human-AI collaboration, foundational to roles in AI ops, trust & safety, and machine learning support

---

Deloitte Australia Data Analytics Job Simulation on Forage - October 2025

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau
- Used Excel to classify data and draw business conclusions

Tata Data Visualization: Empowering Business with Effective Insights Job Simulation on Forage - December 2025

- Completed a simulation involving creating data visualizations for Tata Consultancy Services
- Prepared questions for a meeting with client senior leadership
- Created visuals for data analysis to help executives with effective decision making

PROJECTS

Computer Vision Application (OpenCV | Python | Cloud-Ready)

- Built a **real-time face and object detection system** using **Python and OpenCV**.
- Implemented **image preprocessing, feature extraction, and transformations** to improve detection accuracy.
- Optimized algorithms for **performance, speed, and cloud-based deployment**.

AI Image Classification System (CNN | Keras | AWS-Ready)

- Designed and trained a **CNN model** for multi-class image classification using **Keras and TensorFlow**.
- Performed **data preprocessing, augmentation, hyperparameter tuning, and evaluation** to improve model accuracy.
- Developed a **scalable Python-based pipeline** suitable for deployment on **AWS EC2, SageMaker, or S3**.

House Price Prediction Model (ML | Python | Cloud-Deployable)

- Developed a **machine learning regression model** to predict housing prices using Python.
- Conducted **data cleaning, feature engineering, and exploratory data analysis (EDA)** to enhance predictions.
- Designed workflow for **cloud-based data processing and model deployment**.

Sketch Maker Application (OpenCV | Python | Cloud-Ready)

- Created an **image-to-sketch converter** generating pencil-style sketches using **OpenCV**.
- Applied **edge detection, thresholding, and image transformation techniques** for high-quality outputs.
- Structured project for **fast processing and potential cloud deployment**.

TECHNICAL SKILLS

- **AI / Machine Learning:** Machine Learning, Deep Learning, CNN, RNN, Keras, OpenCV, Scikit-Learn
- **Programming & Libraries:** Python, Pandas, NumPy, Matplotlib, SciPy, PySpark
- **Databases & Data Management:** MongoDB, MySQL, PostgreSQL, SQL Server, Data Cleaning & Transformation
- **Data Visualization & Analytics:** Power BI, Tableau, Microsoft Excel (Pivot Tables, VLOOKUP, Conditional Formatting, Charts)
- **Cloud & Deployment (Optional):** AWS (S3, EC2, SageMaker), Cloud-Ready ML Pipelines

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Google Business Intelligence
- Data Analyst Associate certificate
