*"With a passion for web development ignited in 2019, I have completed my Bachelor's degree in Computer Science in December 2024. Over the years, I have gained extensive experience in full-stack development, working with cutting-edge technologies across various roles. At Apex Solutions, I worked on diverse projects, enhancing my expertise in backend and frontend technologies. I further expanded my skills through freelance and product-based work, and later at Devetiv Ltd, focusing on modern frameworks like Next.js, Vue.js, and Three.js to build high-performance applications."*

## EDUCATION

**University of Karachi,** Karachi, Pakistan — December 2024

Bachelors of Science in Computer Science

**Govt Dehli College,** Karachi, Pakistan — July 2020

Intermediate Pre-engineering (74%)

## PROFESSIONAL EXPERIENCE

**TL Innovation (LIMI Lighting),** Karachi, Pakistan — February 2025 – Present

***Full Stack Web Developer***

At TL Innovation, I am working as a Full Stack Developer on the company's lighting brand **Limi**, contributing to both customer-facing and internal systems. My responsibilities include:

- Developed and maintained the official Limi website using modern frontend technologies.Integrated and consumed APIs efficiently, enhancing real-time interactivity.
- Built a 3D web-based product configurator for customizable lighting products, enabling real-time configuration and visualization.
- Designed and developed an admin panel for managing products, configurations, and system data.
- Implemented dynamic product upload and management workflows, similar to e-commerce platforms like Shopify.
- Integrated backend APIs to manage product data, configurations, and dynamic content.
- Worked on analytics and AI-enabled dashboards to visualize system data and product insights.
- Optimized frontend performance and ensured responsive, cross-device compatibility.
- Collaborated with R&D and product teams to translate technical requirements into functional web solutions.
- **Key achievements:**
    - Delivered scalable and reusable frontend components across multiple modules.
    - Improved product presentation and configurability through interactive and data-driven UI solutions.
    - Enabled streamlined product management through a centralized admin system.

**Freelance Full Stack Developer (**Sentinel Dashboard Project — September 2025 – January 2026

***Full Stack Web Developer***

Worked as a freelance Full Stack Developer on the **Sentinel Dashboard**, a **camera-based monitoring, analytics, and alerting platform** designed to visualize and manage surveillance data at scale.

- Designed and developed a **data-driven frontend dashboard** using **Ant Design** and **ECharts** to visualize camera events, activity trends, and system health in real time.
- Implemented **modular dashboard components** with configurable charts, filters, and time ranges to support analytics-heavy workflows..
- Integrated and consumed **REST APIs** to display camera streams metadata, event logs, alerts, and operational metrics.
- Built and maintained **high-performance backend services using Python FastAPI**, focusing on low-latency data delivery.
- Designed API structures for **event aggregation, analytics summaries, and status monitoring**.
- Implemented **pagination, filtering, and caching strategies** to efficiently handle large volumes of event data.
- Optimized API response times and ensured reliable **frontend–backend communication** for near real-time updates.
- Collaborated with stakeholders to translate surveillance and analytics requirements into scalable technical solutions.
- **Key achievements:**
    - Delivered **responsive and intuitive dashboards** for complex, analytics-heavy surveillance data.
    - Implemented **scalable backend APIs** following a service-oriented architecture.
    - Improved system usability by converting raw camera data into actionable visual insights.

**Devetiv Ltd**, Karachi, Pakistan AUGUST 2024 – January 2025

***Full Stack Developer***

With over a year of experience at Apex Solutions, I further expanded my expertise at Devetiv Software House, honing my skills in cutting-edge technologies and modern development practices, including:

- Advanced skills in **Next.js 15** for both frontend and backend development.
- Expanded expertise in modern JavaScript frameworks, including **Vue.js** and **Three.js**.
- Gained proficiency in Blender basics for **3D** modeling and rendering.
- Delivered **Three.js** demo projects using libraries such as:
  - **react-three/drei**, **react-three/fiber**, **GSAP**, and **Framer Motion**.
- Worked with content management systems:
  - Integrated and customized **Ghost CMS** and **Prismic.io**.
- **Key achievements**:
  - Developed interactive, dynamic 3D user experiences leveraging Three.js.
  - Enhanced content integration and delivery for improved web performance.

**Freelance Full Stack Developer (**MyGloveBox App) March 2024 – August 2024

***Full Stack Web Developer***

Worked as an independent developer on the backend of the **MyGloveBox mobile application**, focusing on **integration automation, AI-assisted document processing, and scalable backend systems**.

- Designed and developed backend services using **Python FastAPI** with a focus on performance and scalability.Designed and developed backend services using Node.js and REST APIs.
- Built **email automation pipelines** to automatically read, filter, delete, and process incoming emails.
- Implemented automated **attachment handling**, extracting and storing documents for further processing.
- Integrated **AI-based document understanding models** to identify document types and extract structured information.
- Categorized and persisted extracted data into the database using defined business rules.
- Integrated multiple **third-party APIs** for vehicle warranty, images, maintenance records, and related services.
- Implemented **cron jobs and background tasks** for scheduled processing and automation workflows.
- Used **process supervision and monitoring** to ensure reliability of long-running services.
- Implemented **caching mechanisms** to optimize API performance, including cache hit/miss handling.
- Optimized database queries and API response times for high-throughput scenarios.
- Collaborated remotely with frontend and mobile teams to deliver end-to-end features.

**Apex Solutions**, Karachi, Pakistan March 2023 – March 2024

***Full Stack Developer***

With 1 year of experience at Apex Solutions, I've gained skills in various technologies and platforms, including:

- **elleways.com:** Spearheaded the development and maintenance with significant achievements:
  - **Stripe Payment Integration:** Enabled secure online transactions.
  - **Google Auth Sign-In:** Implemented for user-friendly authentication.
  - **Dynamic Category and Brands Pages:** Enhanced user experience and site navigation.
  - **WordPress Blogs Integration:** Seamlessly embedded WordPress content into the Next.js app.
  - **Backend Dashboard:** Built on PHP OpenCart for comprehensive management.
  - **Mobile App Creation:** Developed using WebView for cross-platform accessibility.
  - **Email Subscription Integration:** Set up for effective marketing outreach.
  - **Build Optimization:** Improved overall build efficiency and performance.
  - **Impact:** Boosted website performance by 50%.
- **softwarefinder.com:** Created a prototype using Strapi and Next.js.
  - **Impact:** Increased website performance by 30%.
- **Atlantic Company:** Developed a prototype on PayloadCMS.
  - **Impact:** Enhanced website performance by 40%.
- **Technical Adaptability:** Modified WooCommerce plugins and integrated Strapi with Next.js, excelling in dynamic environments.

**Apex Solutions**, Karachi, Pakistan December 2022– March 2023

***Junior Web Developer***

- **Managed OpenCart Sites:** Handled and modified features for **buyon.pk** and **softwarefinder.com**, enhancing functionalities based on OpenCart CMS.
- **Enhanced fatimasalamat.pk:** Integrated and managed several features:

- WhatsApp chat box.
- Dynamic size and currency conversion.
- Shipping management and discount plugins.
- JavaScript modifications and WebView enhancements in Liquid files.

- **Supported WordPress Sites:** Managed **sqpeg.us** and **ultimatesolarenergy.com.eu** for:
  - Content management and custom database entries.
  - Form-to-email integration.
  - Custom PHP modifications for WooCommerce.

**Technoman**, Karachi, Pakistan January 2019– September 2019

***Assistant Web Developer***

- Conducted website quality assurance to ensure functionality.
- Learned C++ and implemented small web functionalities.
- Designed UI/UX for the company website.
- Maintained website security and improved performance
