SUMMARY

I am a Frontend Developer with over 3 years of experience, specializing in React.js and Next.js. I excel at building high-performance, scalable web applications that deliver exceptional user experiences. My expertise encompasses component architecture, performance optimization, and modern tooling. I have successfully developed applications that handle over 15,000 daily transactions, achieving significant performance improvements while prioritizing clean UI and accessibility

EXPERIENCE

08/2025 - 02/2026
Multan, Pakistan

Frontend Engineer
ZainKeepsCode

A company focused on developing innovative web applications

- Built 5 production React.js and Next.js applications with a strong focus on component reusability, scalable architecture, and exceptional UI/UX quality
- Achieved top Lighthouse scores across all projects through lazy loading, image optimization, code splitting, and SSR/SSG strategies in Next.js
- Implemented complex form systems using React Hook Form and Zod with multi-step validation, conditional logic, and real-time error feedback
- Built accessible, responsive UIs with Tailwind CSS and Shadcn/UI, ensuring WCAG compliance and cross-browser compatibility
- Integrated JWT/OAuth authentication flows and role-based access control (RBAC) into React frontends with secure token handling

03/2024 - 08/2025
Multan, Pakistan

React Developer
Green Fin Technologies

A technology firm specializing in financial solutions

- Led the full re-architecture of a legacy .NET ERP to React.js, modernizing a financial platform processing 15,000+ daily transactions
- Improved frontend performance by 30–40% through strategic code-splitting, memoization, virtual DOM optimization, and API response caching
- Built real-time UI features including live financial dashboards, audit logs, and reporting views using WebSockets and React state management
- Established reusable component libraries and design systems that reduced feature development time across the engineering team
- Mentored junior frontend developers, conducted code reviews, and enforced best practices around component design and accessibility

03/2023 - 03/2024
Multan, Pakistan

Frontend Developer
Fistix

A company focused on healthcare technology solutions

- Developed and maintained the React.js frontend for a production Electronic Medical Records (EMR) system used in live healthcare workflows
- Reduced page load times by 25–35% through bundle size reduction, lazy loading, and component-level code splitting
- Built a scalable UI component library used across multiple application modules, significantly accelerating feature development velocity
- Integrated GraphQL and REST APIs, optimizing data-fetching patterns to minimize over-fetching and improve perceived performance

01/2022 - 01/2023
Multan, Pakistan

React Developer (UI)
FreshLay

A startup providing innovative technology solutions

- Developed responsive React UI components from design specifications, ensuring pixel-perfect, accessible interfaces integrated with backend REST APIs

EDUCATION

09/2019 - 07/2023
Multan, Pakistan

Bachelor of Science in Computer Science
Bahauddin Zakariya University

SKILLS

GitHub React Next.js TypeScript JavaScript ES6+ HTML Tailwind CSS Redux Toolkit REST

WebSockets Stripe JWT OAuth Git Vercel Docker GitHub Actions Node.js Express.js

PostgreSQL MongoDB ERP Caching JSON SEO

PROJECTS

Nettify

10/2025 - 02/2026 Multan, Pakistan

Nettify: An AI-powered no-code landing page builder

- Built the complete React.js frontend for an AI-powered no-code landing page builder — featuring a real-time prompt-to-UI rendering pipeline, editable component previews, and one-click deployment
- Engineered a dynamic component rendering system in React that converts LLM-generated JSON layouts into fully styled, interactive web pages

Deepal CMS

09/2025 - 10/2025 Multan, Pakistan

Deepal CMS: A custom CMS admin dashboard

- Designed and built a custom CMS admin dashboard using Next.js App Router, Shadcn/UI components, and Supabase real-time subscriptions for live content updates
- Implemented server-side rendering and static generation strategies to maximize page performance and SEO for the deepal.ma website

Packit Jackit Website

09/2025 - 09/2025 Multan, Pakistan

Packit Jackit Website: A marketing website

- Delivered a high-performance Next.js marketing website with perfect Lighthouse scores using SSG, responsive Tailwind layouts, and optimized image delivery via Next.js Image component

WJGT

08/2025 - 08/2025 Multan, Pakistan

WJGT: World Junior Golf Tour dashboard

- Built a real-time sports dashboard UI with live scoreboard and leaderboard updates using Supabase subscriptions — ensuring zero-refresh live data without performance degradation
