RAYAN TANZEEM

Software Developer/Engineer
03244168465 | tanzeemrayan2@gmail.com | **LinkedIn:** Rayan Tanzeem

Education

Virtual University of Pakistan **Expected** Aug 2026

BSc in **Information Technology**
CGPA: 3.80 (7th semester)

Summary

Aspiring Software Dev, pursuing **BS- IT** with hands-on experience in **MERN stack**. Strong in problem-solving, fast learning, and collaborative development. Eager to contribute to real-world projects, providing web solutions and grow in a professional tech environment.

Work History

National Center of Artificial Intelligence (NCAI) - *Internship* Oct 2025 - Dec 2025

Generative AI *(on-site)* - Python

- Gained hands-on understanding of **AI, ML, DL**, Neural Networks, and **Transformer** architectures.
- Built **multiple projects** in **NLP** and machine learning using models such as **ANN, RNN, LSTM, GRU, and CNN**.
- Worked on **fine-tuning and PEFT** techniques for transformer-based models.
- Designed, built, and evaluated **RAG systems** using **Vector Databases**.
- **Final project** on an **Agentic RAG system**, focusing on autonomous reasoning and retrieval workflows.

ACM UET Lahore - *Apprenticeship* Jul 2025 - Aug 2025

Web Dev *(remote + meetings)* - Next.js + Supabase

- Built a complete **LMS** with **admin** and **customer** roles **RBAC**.
- Added **auth** (OAuth: Google & GitHub, plus email/password with verification & reset).
- **Admin:** manage payments.
- **User:** browse and purchase courses, give feedback and pay using **JaccCash**.
- Admin and Student Dashboards.

Projects

E Commerce WebApp

MERN stack - MongoDB, Express.js, Node.js, React.js

- Built a complete online shopping app with **admin** and **customer** roles **RBAC**.
- **Features:** auth with email verification and password reset.
- **Admin:** manage products and orders.
- **Customer:** browse items, filter, add to cart, and pay using **PayPal**.
- **Payment Integration:** PayPal

Skills

Languages: JavaScript/TS, Python
Databases: NoSQL(MongoDB/Atlas), SQL(Postgres), Firebase, Supabase.
Technologies: React.js, Next.js, Node.js, Express.js. MongoDB, Postgres
Tools: Artificial Intelligence, Vercel/Netlify, Docker, API testing, replit, git
Concepts: Web, OOP, JWT, RESTful APIs, WebRTC, etc…
