SUMMARY

Full Stack Software Engineer with **3+ years** of experience developing web and mobile applications using React, Next.js, Node.js, MongoDB, and Flutter. Strong in REST API development, state management and performance optimization. Experienced in Agile environments with a focus on clean, reusable and maintainable code.

TECHNICAL SKILLS

- **Frontend:** JavaScript, TypeScript, React, Next.js, Tailwind CSS, Material UI (MUI)
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, PostgreSQL, Firebase
- **Cloud & Tools:** Vercel, Render, Netlify, Git, Github
- **Other:** Stripe

WORK EXPERIENCE

Full-Stack Web & Desktop Application Development

Fiverr *June 2023 - Present*

Tech Stack: React (Vite), Tailwind CSS, Node.js, Express.js, MongoDB Atlas, JWT, Context API / Redux Toolkit

- Delivered custom full-stack web and desktop applications for international clients, including restaurant and retail business management systems.
- Developed a React (Vite)-based restaurant platform with digital menu management, order handling, and admin dashboard functionality.
- Built a comprehensive admin web system for a retail clothing business featuring buyer/seller ledger management, transaction tracking, reporting, and printable billing.
- Implemented complex financial business logic for dynamic balance calculations, partial payments, credit handling, and transaction history management.
- Integrated multi-language support (English + Urdu) with RTL layout handling and persistent language preferences.
- Designed secure JWT-based authentication with protected routes and scalable MongoDB Atlas database architecture.
- Created analytics dashboards, reports (daily/monthly/yearly), search & filter systems, and export-ready printable documents.
- Ensured responsive UI design, performance optimization, and production deployment for real-world business usage.

PERSONAL PROJECTS

DawaConnect – AI-Powered Pharmaceutical Marketplace

Tech Stack: Next.js, React, Flutter, Node.js, Express.js, MongoDB Atlas, Redis, Python, TensorFlow, OpenCV, Tesseract OCR, Firebase, Google Maps API.

- Led the development of an AI-powered multi-vendor pharmaceutical marketplace improving medicine accessibility and price transparency.
- Built a full-stack system with real-time inventory aggregation and multi-vendor checkout functionality.
- Implemented secure authentication and authorization using JWT and bcrypt.
- Developed an OCR-based prescription-to-cart system.
- Integrated AI symptom checker, drug interaction alerts, and Google Maps API for pharmacy location services.

Phishing-Simulation – Web-Based Phishing Simulation Platform

Tech Stack: Python, Flask, HTML5, CSS3, JavaScript (ES6), MongoDB Atlas, SQLAlchemy, PyJWT, bcrypt, SMTP (Gmail/Amazon SES), Chart.js.

- Designed and developed a multi-layered phishing simulation platform to enhance organizational cybersecurity awareness through controlled real-world attack simulations.
- Implemented single and bulk email campaign functionality with CSV upload, prebuilt phishing templates, and campaign retry/delete features.
- Built role-based access control (Super Admin, Admin, Employee) with secure admin approval workflows and JWT-based authentication.
- Integrated SMTP services (Gmail/Amazon SES) for realistic phishing email delivery and real-time interaction tracking (opens, clicks, timestamps).

EDUCATION

BS in Software Engineering | COMSATS University Islamabad *Feb 2023-January 2027*

CGPA: 3.66
