HARIS MUJEEB AHMED

Karachi, Sindh |+92 315 1360907 |harisshujrah@gmail.com | LinkedIn

EDUCATION

Mehran University of Engineering & Technology **Nov 2021 - Nov 2025**

Bachelor of Engineering – Electrical Engineering | Power - Major

- CGPA: 3.24/4.0 | Maintained Top 10 academic standing across all four years.
- *Key Projects:* Dual-Axis Solar Tracker: Designed a microcontroller-based dual axis solar tracking system using LDR sensors to maximize solar energy capture. Smart Traffic Light Control: Built an automated traffic signal system with real-time sensor input to optimize traffic flow. Home Electrical Board Control: Developed an IoT-enabled home electrical board for remote load switching, monitoring, and protection.

PROFESSIONAL EXPERIENCE

Sukkur Beverages Pvt. Ltd. (PepsiCo) — Sukkur, Sindh ***July 2025 – Aug 2025***

Operations & Manufacturing Internee

- Monitored day-to-day production line operations, focusing on electrical and mechanical equipment performance to reduce downtime.
- Assisted in preventive and corrective maintenance of motors, conveyors, compressors, and automated production equipment.
- Observed and supported implementation of safety protocols, HSE practices, and compliance with PepsiCo operational standards.
- Applied lean manufacturing and continuous improvement concepts to identify process inefficiencies and improve workflow.
- Coordinated with production, quality assurance, and maintenance teams to support smooth plant operations.

Civil Aviation Authority (CAA), Karachi, Sindh ***June 2024 – July 2024***

Electrical Engineer Intern

- Worked on the operation, inspection, and maintenance of airport airfield lighting systems, including runway, taxiway, and aprons lighting, ensuring compliance with aviation safety standards.
- Assisted in troubleshooting and maintenance of electrical control panels, power distribution boards, and backup power systems.
- Supported relay testing, protection settings verification, and coordination checks under supervision of senior engineers.
- Participated in routine safety inspections and preventive maintenance activities to minimize operational risks.
- Updated electrical schematics, single-line diagrams, and maintenance records in coordination with the engineering team.

EXTRA-CURRICULAR EXPERIENCE

Model United Nations (MUN) Participation ***March 2024***

Delegate - SOCHUM

- Actively participated in MUN conferences, representing Chile in SOCHUM.
- Developed public speaking, negotiation, and critical thinking skills.
- Collaborated with peers to draft resolutions and present policy positions.

Character-Building Society / SSCBS **Nov *2024 - Nov 2025***

Team Member, Event Management

- Participated actively in society initiatives aimed at personal development, teamwork, and ethical leadership.
- Gained strong communication, collaboration, and problem-solving skills.
- Contributed to organizing events and team-based projects, fostering responsibility and organizational abilities.
- Coordinated communication between teams, departments, volunteers, and participants.

TECHNICAL SKILLS & PROFESSIONAL DEVELOPMENT

Technical Skills:

- Software & Tools: Practiced in AutoCAD Electrical, MATLAB/Simulink, Arduino, and ETAP for system design, simulation, and analysis.
- Electrical Systems & Renewable Energy: Knowledgeable in power system design, relay coordination, SCADA, transformers protection, dual-axis solar tracking, and energy efficiency.
- Proficient in professional communication, using AI tools for business processes, and Excel for data analysis and visualization.

Coursera Skills: Proficient in project management, technical documentation, process optimization, and workplace safety compliance.

Certifications: **July 2024 - Present**

- **Google Project Management (Coursera**): Gained expertise in project planning, risk management, team coordination, and project execution methodologies.
- **Health, Safety, and Environment (HSE) Engineering (Coursera):** Developed skills in workplace safety, hazard identification, risk assessment, and environmental compliance.
- **Business Communication and AI for Professionals (LUMS):** Learned professional communication strategies and advanced use of AI tools for business analysis and decision-making.

Other Certifications: Certified in MATLAB, Multisim, Energy Efficiency (NAVTCC), and Solar PV Design and Renewable Energy Systems, with practical and theoretical expertise in electrical and sustainable energy applications.
