IFFAT IQBAL

Objective

Computer Science student with experience building AI systems, machine learning models, and responsive web applications. Completed 8+ technical projects using Python, JavaScript, SQL, and Solidity. Strong background in NLP, frontend development, and data processing.

Skills

- **Programming:** Python, C++, C, JavaScript, SQL, Solidity
- **Web Development:** HTML, CSS, JavaScript, Responsive Design
- **Machine Learning:** NLP, OCR, Data Preprocessing, Predictive Modeling
- **Database:** SQL, Database Design, Schema Design
- **Blockchain:** Ethereum, Solidity, Smart Contracts, MetaMask
  Tools: Git, GitHub, Figma, Scilab/Xcos, Huawei eNSP

Experience

WEB DEVELOPER INTERN — JILANSOFT, KARACHI
Oct 2024 – Nov 2024

- Developed 3 responsive web pages using HTML, CSS, and JavaScript
- Improved cross-device compatibility across desktop and mobile screens
- Fixed 15+ frontend bugs and improved UI functionality
- Optimized layout structure, reducing display issues by 30%

EVSIM INTERN — EV ACADEMY (REMOTE)
Jul 2025 – Aug 2025

- Built 4 electric vehicle simulation models using Scilab/Xcos
- Assisted 5+ teams in debugging simulation errors and improving performance
- Tested and validated simulation results for accuracy

Education

Bachelor of Science in Computer Science and Information Technology
NED University of Engineering & Technology
Expected Graduation: Aug 2026

Certification

- UI/UX Design Specialization — Coursera
- Foundations of User Experience Design — Coursera
- Web Development Certification

Projects

- **AI Resume Screening System**
  • Processed 500+ resumes using Python and NLP techniques
  • Classified candidates with 85% keyword-matching accuracy
  • Reduced manual screening effort by 60%
- **Customer Churn Prediction Platform**
  • Trained machine learning model on 10,000+ customer records
  • Achieved 82% prediction accuracy
  • Improved model performance by 15% through feature optimization
- **Clinical Report Analyzer (AI-Powered)**
  • Extracted data from 1,000+ medical reports using OCR and NLP
  • Achieved 88% data extraction accuracy
  • Reduced manual data processing time by 50%
- **Foodpanda Clone Website**
  • Developed responsive frontend using HTML, CSS, and JavaScript
  • Built 10+ UI components and navigation features
  • Improved responsiveness across 5+ screen sizes
- **Multi-Sender Smart Contract (Blockchain Project)**
  • Created smart contract using Solidity and Ethereum
  • Enabled secure bulk transactions for 50+ wallet addresses
  • Integrated MetaMask for authentication
- **Chess Game in C++**
  • Implemented full chess logic using Object-Oriented Programming
  • Designed 8+ classes for game structure
  • Built complete playable game system
- **Computer Network Simulation**
  • Configured 5+ routers and 3+ switches using Huawei eNSP
  • Achieved successful end-to-end network connectivity
  • Implemented IP addressing and routing configuration

Extracurricular Activities

- Participated in Koders Kombat, a competitive coding competition.
- Participating in a Hackathon, applying problem-solving, teamwork, and coding skills to build innovative solutions under time constraints.
