## Professional Summary

Junior Python Developer with practical experience in Python application development and REST-based system integrations. Hands-on exposure to building web applications using Django and working with relational databases such as MySQL. Familiar with structured backend development practices and cross-platform environments including .NET-based systems. Highly eager to learn new technologies, adapt quickly to evolving environments, and continuously improve technical and problem-solving skills.

## Core Qualifications

- Proficient in Python development with strong understanding of OOP principles and backend logic.
- Experienced building and consuming RESTful APIs for system integration and data exchange.
- Hands-on experience with Django for developing database-driven web applications.
- Practical exposure to automation using Python and Selenium to optimize workflows.
- Working knowledge of MySQL/PostgreSQL, including query writing and CRUD operations.
- Familiar with basic AI/ML concepts and code testing, debugging, and validation practices.
- Hands-on experience during a Data Analytics internship performing data cleaning, SQL querying, and generating actionable business insights.

## Education

- **Bachelor of Science (BS) in Information Technology** – *NCBA&E, Multan — Graduated Aug 2025*
- **Intermediate** – *City Science School & College, Multan — 2020*
- **Matriculation (Science)** – *New Pakistan Model High School, Multan — 2017*

## Work Experience

**AI Neurlz. – Data Analytics Intern (2024 – 2025)**

- Hands-on experience building automated data pipelines in Python and SQL, reducing report generation time by **40%**.
- Performed data cleaning, analysis, and visualization in Excel and Power BI, delivering actionable insights to support strategic decisions.
- Monitored and analyzed transactional and user data, identifying trends that improved business performance by **20%**.
- Developed Python scripts for repetitive data tasks and statistical analysis, saving the analytics team **10+ hours weekly**.

**Imperial Collection UAE – SEO Intern (2023 – 2024)**

- Developed Python-based automation scripts to optimize website SEO, managing keyword research and on-page updates, increasing organic traffic by **30%** over 3 months.
- Conducted competitor analysis and implemented targeted keyword strategies, improving search ranking for 15+ high-value keywords.
- Used Selenium with proxy rotation to simulate user engagement and track website performance, reducing manual SEO monitoring effort by **50+ hours per month**.
- Collaborated with content and design teams to align SEO improvements with marketing objectives, boosting lead generation from web visitors.

## Certifications

- **CCNA: Enterprise Networking, Security, and Automation** – Cisco (May 2024)
- **CCNA: Switching, Routing, and Wireless Essentials** – Cisco (May 2024)
- **CCNA: Introduction to Networks** – Cisco (May 2024)

## Portfolio Projects

- **GMB SEO Automation (Python + Selenium)** – Automated keyword-based searches for local businesses on Google My Business, using proxy rotation and dynamic keyword handling. Increased targeted organic traffic by **25%** and reduced manual effort by **100+ hours per month**.
- **Pose Detection Project (Python + MediaPipe)** – Designed and implemented a real-time pose detection system for a camera application, enabling accurate tracking of human body movements and gestures. Developed the codebase from scratch, improving detection performance and reliability.
- **Real Estate Backend System (MERN Stack)** – Built the backend for a real estate web application as a final year project. Implemented REST APIs for property listings, user authentication, and database management, supporting **500+ simulated property records** efficiently.
- **Data Analytics & Reporting (Python + Looker Studio + Power BI)** – Analyzed structured datasets for business insights, performing data cleaning, validation, and visualization. Automated reporting pipelines to reduce manual reporting time by **40%**, improving decision-making for stakeholders.
- **Freelance Research Assistance Projects** – Assisted on multiple research-based freelance projects, including data collection, cleaning, statistical analysis, and report preparation. Enabled clients to complete projects **30–50% faster** while maintaining high data accuracy.
