Objective

Motivated and curious Computer Science undergraduate with a strong passion for Machine Learning, Artificial Intelligence, and Deep Learning. Seeking a job opportunity to apply academic knowledge in real-world scenarios, strengthen technical expertise, and contribute to impactful AI solutions. I have a **Experience of GenAI** of three months in a aquila360 Software house.

Projects

◆ **Human Identification Using Dental Features (YOLOv8x)**

- Approved by Ignite Funding.
- Project Code: (NGRI-2024-26899)
- Developed a YOLOv8x model to classify individuals using dental image datasets
- Annotated custom dataset using Roboflow
- Utilized TeansorFlow/Keras on Google Colab for training and evaluation
- Achieved 97% accuracy on the test set

◆ **Real-Time Object Detection with YOLOv5 (Self-Initiated)**

- Used pre-trained YOLOv5 for real-time object detection via webcam feed
- Annotated custom dataset using Roboflow
- Achieved 25+ FPS in real-time detection

◆ **HR ChatBot using LLM model**

- Used pre-trained Ollam Model.
- Used Qdrant Database to store hr Policy Dataset.
- For embedding use multi-qa-L6-cos-v1.
- To token count used gpt-3.5-turbo by tiktoken.
- To keep chat history used mongodb.

◆ **Other Small Projects**

Emotion Detection NLP, Customer Segmentation using Clustering, Email Sorting Agent, Sentimental Analysis of Movie Review

Education

National University of Modern Languages (NUML), Islamabad
Bachelor of Science in Computer Science (Gold Medalist) Feb 2021 – Jan 2025
Relevant Courses: Artificial Intelligence, Linear Algebra, Data Structures, Python Programming, Programming Fundamentals (PF), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Software Engineering etc.

Skills

- **Programming Languages:** Python, Java, SQL, C++.
- **ML/DL Tools:** TensorFlow,Keras, PyTorch, OpenCV.
- **Libraries:** NumPy, Pandas, Matplotlib, SentenseTransformer, Tiktoken, Streamlit, Hugging Face.
- **Tools & Platforms:** Qdrant, Google Colab, VSCode, Jupyter Notebook, Docker, Android Studio.
- **Concepts:** LLM, Open Api, Vector Database, YOLO, CNNs, NLP, Data Preprocessing, Supervised & Unsupervised Learning.
- **Operating Systems:** Windows, MacOS, Ubantu.
