Objective

Motivated and detail-oriented AI & Machine Learning Engineer with strong hands-on experience in Artificial Intelligence, Machine Learning, Deep Learning, NLP, and Computer Vision. Skilled in designing and deploying scalable, end-to-end, production-ready AI systems using Python, SQL, FastAPI, and modern ML/DL frameworks. Passionate about building real-world, data-driven AI solutions and eager to contribute to innovative teams while continuously enhancing technical expertise.

Education

Bachelor of Computer Science (BSCS) – *Superior University, Lahore* (2023 – 2027)
CGPA: 3.43

F.Sc. Pre-Medical – *Kips College Bahria Campus* (2020 – 2022)
Marks: 1002 / A+ Grade

Matriculation (Science) – *GHSS Manga Mandi* (2018 – 2020)
Marks: 990 / A+ Grade

Technical Skills

Programming:
Python, C++, SQL, FastAPI (REST APIs)

Machine Learning & Data Science:
Scikit-learn, Pandas, NumPy, EDA, Feature Engineering, Model Training & Evaluation

Deep Learning:
TensorFlow, Keras, PyTorch, CNNs, ANN, Transfer Learning

Computer Vision:
OpenCV, YOLOv8, Image Processing, Tesseract OCR

NLP:
Text Preprocessing, Feature Extraction, Text Classification

AI Automation & Chatbots:
n8n, Workflow Automation, WhatsApp Chatbots, Telegram Bots, Conversational AI

Deployment & Tools:
FastAPI, Flask, Streamlit, Git/GitHub, Linux, Jupyter, VS Code, Google colab, n8n

Databases:
SQL Server, Query Optimization, Database Design

Experience

Freelance AI & Machine Learning Engineer (Remote) | Jan 2025 – Present
• Developed custom **AI and Machine Learning** solutions for business and academic applications.
• Built end-to-end **ML pipelines** including data preprocessing, model training, evaluation, and deployment.
• Developed **scalable AI APIs using FastAPI** for production-ready applications.
• Implemented **NLP-based chatbots** and conversational AI systems for automation and customer interaction.
• Created **AI automation workflows using n8n**, integrating WhatsApp and Telegram chatbots for ordering, appointments, and support.
• Built **computer vision models** using YOLOv8, CNNs, and OpenCV for object detection and image analysis.
• Performed **web scraping**, data extraction, and **SQL**-based data analytics.

Projects

1. Automated Restaurant Chatbot (WhatsApp)

- Developed an AI chatbot to automate restaurant order handling and customer queries via WhatsApp.
- Tech: Python, WhatsApp API, NLP, n8n / automation tools.

2. Doctor Appointment Chatbot (Telegram)

- Built a Telegram-based AI chatbot for booking and managing doctor appointments automatically.
- Tech: Python, Telegram Bot API, NLP, automation workflows.

3. AI Customer Support Chatbot

- Designed an AI chatbot for automated customer support with dataset-based responses.
- Tech: Python, NLP, LLM APIs, automation tools.

4. Brain Tumor Detection (CNN – Medical Imaging) Link

- Built an EfficientNet-based CNN for MRI tumor classification with strong validation performance.
- Tech: Python, TensorFlow, OpenCV.

5. Vehicle Number Plate Detection (YOLOv8 + OCR) Link

- Developed real-time license plate detection using YOLOv8 with OCR-based text extraction.
- Tech: Python, YOLOv8, OpenCV, Tesseract.

6. Credit Card Fraud Detection Link

- Implemented ML models on imbalanced transaction data using SMOTE and Random Forest.
- Tech: Python, Scikit-learn.

7. Heart Disease Prediction Link

- Built predictive ML models with feature engineering on healthcare datasets.
- Tech: Python, Scikit-learn, SQL.

8. Handwritten Digit Recognition Link

- Built a CNN using TensorFlow achieving high accuracy with real-time prediction.
- **Tech:** Deep Learning

9. Blood Group Type Detection Link

- Applied image segmentation and ML classifiers for automated blood type recognition.
- Tech: Python, OpenCV.

10. Stock Price Prediction App Link

- Created ML-based stock forecasting model with Streamlit visualization dashboard.
- Tech: Python, Streamlit.

11. Movie Recommendation System Link

- Built content-based recommendation engine using TF-IDF and cosine similarity.
- Tech: Python, NLP.

12. Hospital Management System (SQL)

- Designed relational database with complex queries, joins, and triggers.
- Tech: SQL Server.

Soft Skills

Communication | Teamwork | Problem-Solving | Critical Thinking | Adaptability | Leadership | Time Management | Creativity | Emotional Intelligence

Certificates

- **Introduction to SQL** – SoloLearn & Superior University *(May 2025)* *Link*
- **Python for Data Science, AI & Development** – IBM / Coursera *(July 2025)* *Link*
- **Data Analysis with Python** – IBM / Coursera *(Aug 2025)* *Link*
