Professional Summary

Motivated and results-driven Frontend Developer with 2 year of professional experience. Currently working remotely with Zarraud Group of Companies, contributing to a modern Restaurant Management Platform using Next.js, Tailwind CSS, and TanStack Query. Proficient in React.js and Next.js, with strong skills in building responsive, user-friendly, and high-performance interfaces. Experienced in optimizing web performance, implementing state management, and integrating RESTful APIs for seamless frontend functionality. Strong problem-solving abilities with a focus on clean, maintainable code and modern UI/UX standards. Adept at collaborating in agile teams and continuously learning new frontend technologies to enhance product quality and innovation.

Technical Skills

- **Frontend:** React.js, Next.js, Tailwind CSS, Material UI
- **State & Data:** TanStack Query, REST APIs
- **Backend (Basic):** MongoDB, PocketBase, Firebase
- **Tools:**Git, Chart.js, Radix UI,Context Api
- **Languages**: JavaScript,TypeScript

Experience

Zarraud Group of Companies (Remote)

Frontend Developer

September 2025 – Present

Working remotely as a Frontend Developer, contributing to a scalable Restaurant Management Platform that streamlines customer ordering and client-side operations.

Tech Stack: Next.js, Tailwind CSS, TanStack (React Query), Chart js, Radix UI, Firebase.

- Developed and maintained responsive, high-performance UI components for the customer and client-facing applications.
- Enhanced user experience through pixel-perfect layouts and dynamic UI interactions across multiple modules.
- Collaborated with backend teams to integrate APIs for menu management, order handling, and dashboard views.
- Implemented state management and data fetching with TanStack for optimized rendering and real-time updates.
- Focused on code reusability, clean architecture, and scalability in a production-grade Next.js environment.

Worked on continuous UI refinements to align with brand design systems and improve user engagement.

WODWES, Faisalabad

Junior Frontend Developer

January 2024 – August 2025

Worked on multi-tenant **Club Management** and **Restaurant Management Systems** with integrated **POS functionality**.

Tech Stack: React.js, Next.js, Tailwind CSS,Pocketbase

- Worked on multi-tenant Club Management and Restaurant Management Systems with integrated POS functionality.
- Tech Stack: React.js, Next.js, Tailwind CSS
- Built responsive, modular UI components and dynamic dashboards for enhanced scalability and user experience.
- Implemented role-based UI flows and seamless integration with APIs for real-time data updates.
- Optimized frontend performance through efficient state management, caching, and asynchronous data handling.
- Contributed to creating high-performing, user-friendly interfaces with modern UI/UX standards for multi-tenant systems.

Education

Bachelor of Computer Sciences

G.C University Faisalabad | 2018-2022 |CGPA: 3.19

Intermediate(I.C.S)

Government Islamia College, Chiniot | 2015-2017 |1st Division

Projects

Zarraud Group of Companies **September 2025 - Present**

Frontend Developer

Project: Restaurant Management Platform

Project Details: Contributed to the Payon Restaurant Management System — a cloud-based platform offering digital menu management, client dashboards, and order handling modules. Focused primarily on creating visually appealing and responsive interfaces for both the customer portal (customer.payon.app) and client dashboard (client.payon.app).

Technologies: Next.js, Tailwind CSS, TanStack Query, Chart js, Radix UI, Firebase.

Key Features & Responsibilities:

- **Frontend Development:** Built a dynamic and responsive UI with Next.js and Tailwind CSS, ensuring smooth performance across all devices.
- **API Integration:** Collaborated with backend teams to integrate and manage REST APIs for menu, order, and dashboard data.
- **State Management:** Utilized TanStack Query for optimized data fetching, caching, and real-time UI updates.
- **Performance Optimization:** Enhanced page speed and component rendering for an improved user experience.
- **UI Consistency:** Maintained design consistency by adhering to brand guidelines and reusable component structures.
- **Collaboration:** Worked with remote designers and stakeholders to align UI implementation with business goals and improve usability.

WODWES, Faisalabad

Junior Frontend Developer

Project: Restaurant Management System

Project Details: Built a scalable and modern Restaurant Management System to streamline operations such as order processing, menu updates, and staff role management. The system features a responsive and dynamic UI to handle multiple user roles effectively.

Technologies: Next.js,Material UI, Tailwind CSS

Key Features & Responsibilities:

- **Frontend Development:** Designed and implemented a responsive, modular, and accessible UI using Next.js and Tailwind CSS, optimized across devices.
- **Order Management Interface:** Built real-time order processing and kitchen tracking components for efficient workflow visualization.
- **Menu Management:** Enabled admins to manage categories, availability, and pricing dynamically from the dashboard.
- **Menu Management UI:** Enabled admins to dynamically manage menu categories, availability, and pricing directly from the dashboard.
- **Performance Optimization:** Applied client-side caching, code-splitting, and asynchronous rendering for fast and smooth user interactions.
- **Dynamic Routing:** Implemented role-based dynamic routing for different user dashboards and access levels.

WODWES, Faisalabad

Junior Frontend Developer

Project: Bridge Co-Working Space Management System

Project Details: Developed a modern and scalable web application for managing a co-working space, enabling efficient handling of memberships, bookings, and workspace operations through a responsive and user-friendly interface.

Technologies: Next.js, Tailwind CSS , Context api

Key Features & Responsibilities:

- **Frontend Development:** Designed and implemented a responsive, modular, and accessible UI using Next.js and Tailwind CSS, optimized across all devices.
- **Workspace Management Interface:** Built interactive dashboards for managing desks, private offices, and meeting rooms with real-time availability updates.
- **Booking & Membership Management:** Enabled admins to manage member plans, reservations, and workspace assignments dynamically from the dashboard.
- **Role-Based Access UI:** Implemented role-based interfaces and permissions for admins and staff to control system access and workflows.
- **Performance Optimization:** Applied client-side caching, code-splitting, and efficient state management for smooth and fast user interactions.
- **Performance Optimization:** Applied client-side caching, code-splitting, and efficient state management for smooth and fast user interactions.
