Education

National University of Computer and Emerging Sciences
BS (Computer Science)
Punjab Group of Colleges, campus -8 , Ferozpur Road Lahore
ICS (Intermediate in Computer Science)
BISE Lahore
Matriculation

Experience

Jmm Technologies
ASP.NET Engineer (01/09/2023 – 31/12/2023)
Programmers Force
Associate Data Scientist (01/09/2025 – 17/11/2025)

Projects/Portfolio

Simulative Emotional Expression Robot (Final year project)
We have to go with Computer vision as our domain for future so we done our FYP in that as well. We have created a interactive expression robot that can do communicate through facial expressions.

Control traffic with the traffic signal (DLD project on hardware)
The objective is to demonstrate how digital logic principles—like counters, flip-flops, and state machines—can be applied to build a reliable and automated traffic control system. This project not only reinforces theoretical DLD concepts but also highlights their practical applications in smart city solutions.

Hospital Database Management System
That is designed to efficiently manage and organize patient records, doctor information, appointments, billing, and other hospital operations. This project aims to digitize and streamline hospital workflows by creating a centralized database that ensures quick access to accurate and up-to-date information.

Digital Stopwatch
I had used basic Digital Logic Design concepts to do this project.

Tic Tac Toe Game
I had used Operating Systems concepts to made this game on Linux operating system.

Activities, Honors & Awards

Participant, Project exebition, FAST NU
Teacher Assistant oF Entreprenureship, FAST NU

Skills & Tools

Programming Skills & Tools
C++, Python 3, C#, Asp.Net, Assembly Language, Machine Learning,
Computer Vision , Arduino Programming, Visual Studio, Jupyter Notebook, PyCharm, Keil, Arduino

Hardware Skills
Digital Logic Design
Other Skills
Blender , Sketching

Interests & Hobbies

Sketching, Anime Reading Articles Related to AI, Machine Learning, Computer Vision
