EDUCATION

University of South Asia — Lahore, Pakistan

Bachlor of Science in Computer — 2021 - 2025

Aspire College — Sangla Hill

FSC(Pre-Medical) — 2019 - 2021

SKILLS SUMMARY

- **Language:** JavaScript (ES6+),,HTML5,CSS3, SQL,MongoDb
- **Technologies:** React Native, MERN Stack,React.js,Node.js,Express.js,Next.js, Firebase, Supabase,Material Design
- **Tools:** VS Code, Figma, Git & GitHub, Postman, MySQL Workbench etc
- **Platform:** Web, Mobile App
- **Soft Skills:** Team Leadership, Collaboration, Problem Solving, Agile Development

EXPERIENCE

(1+ year)

React Native (Internship lead to permanent role) — PremLinx, Garden Town Lahore (May - July)

React Native Developer — PremLinx, Garden Town Lahore (July- March)

PROJECTS

1.React Native Developer – ORAM360 (Marketing Agency App)

Developed a customer-facing mobile app for a marketing campaign management platform, enabling brands to create and manage outdoor advertising campaigns. Implemented campaign creation forms, real-time status tracking (design, printing, installation, inspection), proof review with approve/reject functionality, and asset downloads. Built the UI using Material Design components and managed authentication and global state with Redux (including persisted login). Integrated device features such as camera, gallery, and location permissions to enhance functionality.

2.React Native Developer – SmartVisits (Driver & Salesman Operations App)

Developed a role-based mobile application for drivers and salesmen to manage daily operations and field activities. Implemented Redux-based authentication with persisted login and daily attendance tracking. Designed a shared layout with role-specific content, enabling drivers to manage weekly shifts, assigned routes, and pickup/drop tasks, while salesmen handled shop visits, product deliveries, and task-based workflows.

Integrated Point of Sale (POS) form submission with customer details, product quantities, and image proof uploads to complete tasks, ensuring structured reporting and operational transparency.

3.React Native Developer – Nyano AI-based Health & Mind Care Mobile App

Developed features for Nyano, an AI-based health and mind care mobile app that analyzes user wellness through face scanning and food recognition. Integrated Supabase to manage user data, including mood tracking, health records, and personalized diet plans. The app enables users to scan their face to estimate heart rate, breathing rate, blood pressure, stress, and activity levels, track daily moods via a calendar, scan food to identify ingredients, and receive custom diet recommendations based on dietary preferences and region. Responsible for handling Supabase data fetching, storage, and integration, ensuring real-time display of AI-generated health insights and recommendations within the app.
