Summary

Motivated final-year **Computer Science student** at the **University of South Asia** with a strong focus on **web development**. Currently building practical experience in **React.js** and modern frontend technologies through hands-on projects. Possess a solid understanding of programming fundamentals and responsive UI design, with a continuous drive to improve technical skills and deliver efficient, user-centered web solutions.

Education

Bachelors in Computer Science

2023 –2027 (Expected)

Faculty OF Computer Science at University of South Asia Lahore, Pakistan

- Maintained a strong CGPA of **3.51/4.00**, demonstrating consistent academic performance across core computer science courses.
- Gained experience across multiple computer science domains, effectively combining theoretical concepts with practical expertise

Professional Experience

Final Year Project (Faculty of Computer Science University of South Asia) March 2026 – August 2026

Junior Full-Stack / Backend Engineer

- Developed and maintained RESTful and Graph QL APIs using Node.js, Express, Type Script, and MongoDB, supporting scalable web application features.
- Collaborated closely with team members to design data models and backend **services** aligned with frontend requirements, ensuring seamless client–server communication.
- Implemented backend logic for a recommendation system, improving feature relevance and overall user experience.
- Worked in a team-based development environment, contributing to planning, debugging, and performance optimization of web application components.

Projects

Blind People Safety Detection System (*Faculty of Computer Science University of South Asia*) November 2025 – January 2026

- Developed a real-time safety detection system for visually impaired users using YOLOv8 for obstacle detection**.**
- Built a Stream lit-based web interface to visualize detections and provide real-time feedback.
- Optimized model performance through preprocessing and evaluation to improve detection accuracy**.**

Skills

- Languages: C++, React.js, JavaScript, Python,
- Databases: MySQL, Machine Learning & Data Analysis: NumPy, Pandas, Open CV, Scikit-learn
