MUHAMMAD TANVEER IQBAL

Lahore, Pakistan | +92-3067373021 | syedtanveeriqbal72@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Results-driven AI Developer and ML Engineer with 2+ years of hands-on experience designing and deploying production-ready AI systems across chatbots, RAG pipelines, voice agents, and computer vision. Proficient in LangChain, LangGraph, OpenAI, Groq, Hugging Face, and agentic AI workflows. Proven track record of delivering end-to-end solutions — from LLM fine-tuning (LoRA, PEFT) and vector database integration to scalable cloud deployment on Azure with Docker and Kubernetes. Published researcher with expertise spanning Generative AI, NLP, deep learning, and real-time STT/TTS voice systems,Voice AI

WORK EXPERIENCE

7 Kings Code – **AI Engineer** June 2025 – Present

On-Site | Lahore, Pakistan

- Designed and implemented 7 production-ready AI chatbot systems — 7KingsCode Chatbot, Multi-Tenant RAG Platform, Job Offers Recommendation Bot, Intelligent E-commerce Assistant, Financial Advisory Bot, Technical Support Helpdesk Bot, and Medical Chatbot with automated appointment scheduling — leveraging RAG pipelines, LangChain orchestration, and vector databases for context-aware, scalable conversational AI.
- Built real-time AI voice and vision systems including a Face Emotion Detection system and RingCentral Sales Voice Agent; integrated FastRTC and WebRTC for low-latency streaming, with advanced STT/TTS pipelines via Speechmatics, Deepgram, Whisper, Hume, and Kokoro.
- Delivered end-to-end AI architecture and deployment using OpenAI, Groq, and Ollama LLMs, Hugging Face models, and vector databases; performed LLM fine-tuning, embedding optimization, tool calling, agentic AI workflows, and scalable cloud inference design.

TICER – **AI/ML Engineer** Apr 2024 – May 2025

On-Site | Bahawalpur, Pakistan

- Developed Urine Sediment Particles Detection system using YOLOv8 with custom model training, achieving high diagnostic accuracy in a medical imaging context.
- Built a RAG chatbot using Hugging Face, LangChain, and Streamlit for dynamic content generation; deployed with MLOps best practices including CI/CD pipelines and model monitoring.
- Created an AI-Powered CV Parsing System using OCR and LLM (Groq - llama3.3-70b-versatile) to accurately extract and structure resume data at scale.

PROJECTS

FinBERT Fine-Tuning — Financial Sentiment & Risk Classification | Fintech AI · 7 Kings Code Nov 2025

Fine-tuned FinBERT with LoRA/PEFT on earnings call transcripts, financial news, and regulatory filings for sentiment classification and compliance risk flagging (93%+ accuracy). Integrated into a document intelligence pipeline processing unstructured PDFs and emails; deployed via FastAPI on Azure ML with hallucination guards and cost-optimized batching. Tech: Hugging Face Transformers, LoRA, PEFT, PyTorch, FastAPI, Azure ML, Pinecone.

Sales Calling Agent | 7 Kings Code Jan 2026

Autonomous AI-powered outbound sales agent conducting real-time voice conversations, intelligently persuading prospects to schedule discovery meetings by identifying business solution gaps. Tech: Hume AI Voice Model, LangChain, LangGraph, RingCentral API & Softphone SDK, Express.js, OpenAI GPT, Python, JavaScript.

AI Email Agent for Customer Support | 7 Kings Code Sep 2025

Intelligent email processing system auto-categorizing incoming emails (technical support, customer support, sales), generating context-aware LLM responses, and creating organized tickets with priority assignment. Features email parsing, sentiment analysis, and automated workflow integration. Tech: LangChain, OpenAI API, FastAPI.

Brain Tumor Classification System | Final Year Project Feb – May 2025

AI-driven web application for automated MRI brain tumor detection using CNN architecture (95%+ accuracy). Features multi-class tumor classification, real-time image analysis, secure user authentication. Tech: TensorFlow, FastAPI,SQLLite,Keras,React,Tailwind CSS,JWT Authentication,Matplotlib,ReportLab

Attendance System Using Face Recognition | TICER Dec 2024

Automated attendance tracking using live face detection, dlib face encoding for high-accuracy recognition, database management, and automated Excel report generation. Tech: Django,SQLite,Google MeidaPipe,Scipy,OpenCV,React18,Vite,Webcam,

TECHNICAL SKILLS

Generative AI & LLMs: OpenAI, Azure OpenAI, Groq, Ollama, Hugging Face, LLM Fine-Tuning (LoRA, QLoRA, PEFT), Prompt Engineering, Instruction Tuning, Embeddings, Tokenization, Transformers

AI Frameworks: LangChain, LangGraph, LlamaIndex, Agentic AI, RAG Systems, Multi-Tenant Architecture, Tool Calling, Agent Workflows

Vector Databases & Search: Pinecone, FAISS, Weaviate, Semantic Search, Embedding Optimization

ML / Deep Learning: Machine Learning, Deep Learning, Computer Vision, Data Science, MLOps, CI/CD Pipelines, Model Monitoring, Hallucination Detection, Cost Optimization

Cloud & Deployment: Azure ML, Azure OpenAI, Docker, Kubernetes, Containerized Deployments, Scalable Inference Design

Voice AI: STT/TTS Pipelines, Speechmatics, Deepgram, Whisper, Hume, Kokoro, FastRTC, WebRTC

Data & Processing: Structured & Unstructured Financial Data, PDF Processing, Email Parsing, Call Transcript Analysis, OCR, Data Collection, Analysis, Visualization

Programming & Tools: Python (Pandas, Matplotlib, Seaborn, TensorFlow, Scikit-learn), FastAPI, React, HTML, CSS, JavaScript, n8n Automation, SQL, MySQL, SQLite, Git, GitHub, Ngrok, Vibe Coding

EDUCATION & PUBLICATIONS

Islamia University of Bahawalpur – B.Sc. Information Technology (IT)

Publication: "YOLO-Swin Hybrid Model for Enhanced Small Object Detection in Aerial Images" [Link]
