Momin Abbas Shah

Software Engineer with a focus on MERN stack development, continuously learning and strengthening skills through hands-on project work. Strongly interested in problem-solving and building efficient solutions, while exploring new technologies and modern development practices. Motivated to gain practical experience by contributing to diverse real-world projects.

WORK EXPERIENCE

Final Year Project – AI-Powered Eye Disease Detection Mobile Application

COMSATS University Abbottabad

Developed a cross-platform AI mobile app for early eye disease detection with explainable predictions, doctor recommendations, consultation requests, outbreak alerts, and a secure admin dashboard.

Accomplishments

- Early detection of internal and external eye diseases using fundus and mobile images.
- Automated disease prediction with deep learning models (EfficientNet, ResNet, MobileNet).
- Grad-CAM visualizations for explainable AI predictions.
- Doctor recommendation system with geolocation (20 km radius).
- Consultation request workflow for patients.
- Outbreak alert notifications for disease trends.
- Secure admin dashboard for patient data management and monitoring.
- **Flutter,Django,MySQLTensorFlow, PyTorch, EfficientNet, ResNet, MobileNet,REST APIs,Geolocation APIs**

MERN Stack Internship

Exarth

Developed a content-focused web application using the MERN stack, creating responsive UI components, interactive features, and ensuring smooth user experience.

Sep 2025 - Dec 2025

Frontend Engineer Intern

Firnas Tech

*Developed the **University Admin Panel** using React.js with responsive UI and backend API integration, gaining hands-on frontend development experience.*

Sep 2024 - Dec 2024

Semester Project – Supermarket Billing Management System (Java)

COMSATS University Abbottabad

Developed a Java-based system to automate billing, inventory management, and transaction tracking for a supermarket.

EDUCATION

Bachelor of Science in Software Engineering

COMSATS University Islamabad, Abbottabad Campus

Mar 2022 - Jan 2026

Courses

- Data Structures & Algorithms
- Database Systems
- Operating Systems
- OOP
- Web Development
- Machine Learning

SKILLS

React.js | Tailwind CSS | HTML5 | Node.js | Express.js | Django | MySQL | MongoDB | REST APIs | GitHub

CERTIFICATES

Certificate of Participation – Final Year Project Competition

COMSATS University Abbottabad

Participated in the university-level Final Year Project competition, presenting an AI-powered mobile application for early eye disease detection. Gained experience in project presentation, technical demonstration, and showcasing innovative solutions.
