Haris Sadiq

Rawalpindi | 03493473761 | meerharissadiq031@gmail.com | Linkedin | GitHub

SUMMARY

Machine Learning and Data Science enthusiast with hands-on experience in Python, Scikit-learn, and TensorFlow/Keras. Skilled in building end-to-end AI applications including recommendation systems, chatbots, and predictive models with Flutter frontends and Flask backends. Passionate about applying ML techniques to build scalable, real-world intelligent solutions.

EXPERIENCE

AI Intern

Cybron Technology | PSEB Apprenticeship Program | Mar 2026 – Present

- Working on real-world AI and Machine Learning projects under industry supervision.

Machine Learning Intern

CodeAlpha | Remote | Jan 2026

- Developed predictive ML models using Python, Pandas, NumPy, and Scikit-learn.
- Performed exploratory data analysis, feature engineering, and model evaluation.

EDUCATION

BS Computer Science

COMSATS University Islamabad, Abbottabad Campus | 2022 – 2026

CGPA: 3.5

Relevant Coursework

Data Structures, Artificial Intelligence, Machine Learning, Database Systems, Software Engineering, Statistics & Probability

---

FINAL YEAR PROJECT (FYP)

Next Step – Intelligent Course Recommendation System

Technologies: Flutter, Flask, PostgreSQL, Machine Learning, NLP

- Developed a personalized course recommendation system using based on student academic performance.
- Built an NLP-based academic chatbot using a **DistilBERT** model to answer student queries.
- Designed Flask-based ML pipelines and integrated PostgreSQL for storing academic data and user preferences.

PROJECTS

AI-Powered Calculus Problem Solver (Ongoing)

Technologies: Flutter, Python, Flask, OCR

- Developing an AI system to recognize mathematical expressions from images using OCR and generate step-by-step solutions.
- Built Flask APIs and a Flutter mobile interface for automated problem-solving assistance.

Machine Learning Projects

Tip Predictor Web Application

- Built a Django-based web application to predict restaurant tips based on user inputs.
- Focused on end-to-end ML deployment and backend integration.

Credit Scoring Prediction System

- Developed ML models to predict creditworthiness using real-world financial data.
- Evaluated model performance using accuracy, confusion matrix.

Emotion Recognition from Speech Project

- Built a deep learning system to classify human emotions (happy, sad, angry, etc.) from audio speech.
- Extracted MFCC features from RAVDESS dataset and trained a CNN model using TensorFlow/Keras.
- Implemented CNN layers (Conv2D, MaxPooling2D, Dropout) to detect patterns in audio features.

Spam Email Detection System

- Built a TF-IDf based ML classifier for spam email detection.

Automatic Data Profiling Tool

- Developed a Streamlit-based tool using ydata-profiling to generate automatic insights from uploaded CSV files.

CERTIFICATIONS

- Google Data Analytics Professional Certificate (Coursera)
- Process Data from Dirty to Clean (Coursera)
- Programming in Python (Meta through Coursera)
- HP Data Science Certification
- Python for Data Science (IBM through Coursera)

SKILLS

Programming: Python, SQL, C/C++, Java ,Dart
Machine Learning & AI: Classification, Regression, Neural Networks, NLP, Feature Engineering, Hyperparameter Tuning, Cross Validation
Libraries & Frameworks: Scikit-learn, TensorFlow/Keras, Pandas, NumPy, Matplotlib, Seaborn, Streamlit, Flask
Deployment & Tools: Flask APIs, Streamlit Applications, joblib
Databases: PostgreSQL, Hive

SOFT SKILLS

Analytical Thinking | Problem Solving | Communication | Team Collaboration | Continuous Learning
