Home: Post office khas Bua village Tehsil Shakar Garh District Narowal, 51800 Shakargarh (Pakistan)

ABOUT ME

I am a committed and goal-oriented AI Automation Engineer & Frontend Developer with 6+ months of hands-on experience in workflow automation, modern web development, and applied AI. I build intelligent automation systems using n8n, Zapier, Make, APIs, and AI agents, and craft fast, scalable interfaces with React, Vite, Tailwind, and Directus CMS. My practical background in Data Science, Machine Learning, and Deep Learning includes real world projects such as medical image classification, traffic detection, and market analytics. I thrive on transforming manual processes into smart, automated systems and delivering efficient, scalable solutions that drive impact.

EDUCATION AND TRAINING

SECONDARY EDUCATION

Govt. Higher Secondary School [21/07/2018]

City: Shakargarh | **Country:** Pakistan | **Field(s) of study:** Science | **Level in EQF:** EQF level 4

INTERMEDIATE

Punjab College [14/10/2021]

City: Shakargarh | **Country:** Pakistan | **Field(s) of study:** Computer Science | **Level in EQF:** EQF level 5

BACHELOR

Air University [11/09/2025]

City: Multan | **Country:** Pakistan | **Field(s) of study:** Bachelor of Science in Computer Science | **Level in EQF:** EQF level 6 | **Thesis:** Fusion of Models For Medical Images

Academic background includes: Programming of Fundamental , Algorithms, Data Base ,Data Structures, Compiler Construction, Artificial Intelligence, Theory of Automata, Design and Analysis of Algorithms, Object-Oriented Programming, Programming Fundamentals, Data Science, and Software Engineering. Experienced in Python, Flask, Django, MongoDB, Automation Ai agents, Data Science, and building scalable and secure web applications.

WORK EXPERIENCE

Talent Forge – Lahore

JUNIOR PYTHON DEVELOPER

[01/02/2024 – 04/2024]

- Developed and maintained back-end systems using Python,Django, and Flask.
- Assisted in designing RESTful APIs to support front-end and third-party integrations.
- Worked with databases to perform data management,optimization and query handling.
- Collaborated with the development team to deliver reliable and scalable solutions.
- Debugged, tested, and improved existing code to enhance performance and stability.
- Demonstrated strong problem-solving skills and quickly adapted to new technologies.

Octacer – Lahore, Pakistan

AUTOMATION ENGINEER

[01/09/2025 – 31/12/2025]

• Developed and automated business workflows using n8n, Make.com, Zapier, and custom API integrations to streamline client operations and reduce manual effort.
• Built and optimised automation pipelines for lead generation, CRM syncing, messaging platforms (WhatsApp, Messenger), and email outreach systems (Instantly.ai).
• Integrated third-party services and APIs, resolved authentication issues, and improved automation reliability through error-handling and monitoring logic.
• Collaborated with cross-functional teams to gather requirements, deliver scalable automation solutions, and maintain clear documentation and workflow logs for production environments.
• Developed and maintained responsive web applications using React.js and TypeScript, improving user engagement by 25%

SKILLS

Python (computer programming) / n8n / make / Zapier / Automation / Python Django Web Frameworks / Flask, Web Scraping / Machine learning / Deep learning / Data Science / Data Collection, Data Processing,

LANGUAGE SKILLS

Mother tongue(s): English | Urdu
