Muhammad Usman Asim

Associate Software Engineer

usmanasim295@gmail.com +92 319 7135894 https://www.linkedin.com/in/osman-asim-

A highly motivated Associate Software Engineer with **1+ year** of experience in web development. Proficient in **JavaScript, React.js, TypeScript, Node.js, Express.js, and MongoDB**, with expertise in building scalable web applications. Skilled in both front-end (HTML5, CSS3, Tailwind, Bootstrap) and back-end (Node.js, **Express.js, REST APIs**) development. Experienced with state management using **Redux** and Redux Toolkit, database management with **SQL/NoSQL (PostgreSQL, MongoDB, NeonDB),** and containerization with **Docker**.
Passionate about continuous learning and applying new technologies to solve complex problems. Adept at collaborating with cross-functional teams to deliver high-quality solutions. Committed to writing clean, maintainable code and optimizing applications for performance.

Experience.

Mern – Pern Stack Intern / Techniers *Feb-2025*

- Gained foundational experience in **HTML5**, **CSS3**, **JavaScript**, and **React.js**. After 20 days, began contributing to **live projects**, including designing, coding, and debugging web applications.
- Coded websites using HTML5, CSS3, JavaScript, and React js languages.
- Fixed bugs from existing websites and implemented enhancements that improved functionality and efficiency.
- Enhanced website functionality and responsiveness using **Tailwind CSS**, **Bootstrap**, and **Material-UI**..
- Developed modern web applications with React, focusing on reusable components and **RESTful API** integration..
- Collaborated with a team to gain knowledge, implement improvements & optimize the user interface.

Associate Software Engineer / Techniers *May-2025*

- Worked in a team environment and independently to consistently meet product design requirements within the scheduled completion deadline.
- Developed and maintained modern web applications using **ReactJS** and **Next.js**, with a focus on creating highperformance, user-friendly interfaces.
- Managed both NoSQL (**MongoDB**) and relational (**MySQL**) databases
- Utilized Git and GitHub for version control and streamlined development.
- Designed and implemented RESTful APIs with Express.js to facilitate seamless communication between front-end and back-end systems

Live Projects

Txt@solutions.ai **(React js , Node js , Heroku , Typescript , Redux , Ai Chatboat)**

- Worked as a **Frontend Developer** on **Txt2Solutions**, an AI-enabled SMS platform, where I contributed to building responsive user interfaces using **React.js** and **TypeScript**. I integrated multiple APIs for SMS delivery tracking, real-time messaging, and automated scheduling, ensuring seamless user interactions. Collaborated with backend engineers using **Ruby on Rails (RoR)** and optimized frontend performance to ensure scalability. The platform served clients in diverse sectors like retail, healthcare, and nonprofits, allowing them to run SMS campaigns, track results, and automate processes. Additionally, I utilized **GitHub** for version control and team collaboration, ensuring smooth coordination throughout the development process.

Falcon Tour Travel Platform **(Next js , Express js, Postgres, Stripe , Cloudinary , Role base authentication)**

- Developed a travel platform that facilitates event-based travel, allowing users to create and manage events by providing details such as destination, travel dates, and pick-up/drop-off information. Implemented payment integration with **Stripe** and enabled seamless sign-up/sign-in functionality through **JWT**. Integrated **Cloudinary** with **Multer** for media management, allowing users to upload images and documents related to their events. Worked as a **Full Stack Developer**, collaborating with two other developers to build the platform using **React** for the frontend and **Node.js** for the backend, with **PostgreSQL** as the database. Successfully completed the project within **one month**, ensuring a fully functional and user-friendly platform for event-based travel manage

Itqan **(React js , Redus tookit , Node js , Git Lab , AWS)**

- Developed a user-friendly web application that provides efficient solutions for daily household tasks such as plumbing, electrician services, etc.
- Delivered comprehensive support for commissioning and initial MBE installations through the app, resulting in faster and more accurate installations.
- Successfully integrated an Admin panel to monitor customers and partners.
- Streamlined communication between customers, service providers, and administrators, improving overall service efficiency and customer satisfaction. some short

Practice Projects

- AI Code Reviewer
- Online Job Portal
- E-commerce Platform(Mern Stack)
- Learning Management System (LMS)
- Instagram Clone & Foodify application
- Other different website or Companies' Portfolio

Education

Ripha International University – Lahore, Pakistan **(Sep/2023 - Aug/2025)**

- Associate Degree in Computer Science
- GPA: 3.6

Technical Skills

- HTML/HTML5
- CSS/CSS3
- C & C++ & OOP
- JavaScript
- React js
- Tailwind
- Express.js
- REST API's
- TypeScript
- Bootstrap
- Prisma
- Shadcn-ui
- Redux toolkit
- SQL/NoSQL
- Next.js
- Node.js
- PostgreSQ
- Redux
- MongoDB
- NeonDB
- Git & Github
- Docker
- C & C++ & OOP
