Faizan Shaukat

faizanshoukat55@gmail.com (92)3134946526 github.com/faizanshoukat5

SUMMARY

As a dedicated full-stack developer, I've led multiple projects, building modern web applications with seamless front-end and back-end integration. I've incorporated AI and machine learning, including convolutional neural networks, using advanced tools for data processing and model evaluation, boosting project performance. I've won hackathons by creating innovative solutions and optimizing functionality, showcasing my ability to deliver impactful results in computer science and web development.

EXPERIENCE

Fullstack Web Dev

UOL **January 2025 - July 2025, Lahore**

- Engineered and deployed feature updates for the department website by collaborating with faculty to gather requirements, contributing to an improved user experience for students and staff.
- Integrated API endpoints and back-end services with front-end interfaces, enabling seamless data exchange and elevating functionality for users across multiple university platforms.

Backend Web Development Intern

EcodeCamp Pvt Ltd. **June 2024 - October 2024, Lahore**

- Engineered RESTful API endpoints and collaborated with cross-functional teams to integrate client requirements, enhancing application scalability and reliability at EcodeCamp Pvt Ltd.
- Developed robust database schemas and automated data validation processes, strengthening data integrity and supporting seamless feature deployment for client-facing projects at EcodeCamp Pvt Ltd.

PROJECT

AI Movie Recommendation Engine

github.com/faizanshoukat5/AI-Movie-Recommender

- Built a full-stack AI Movie Recommender using React, Flask, and Firebase, integrating TMDB for rich movie data.
- Developed ML models (SVD, NMF, ensemble) with Python and scikit-learn, achieving RMSE <0.85 on MovieLens.
- Delivered features like personalized recommendations (<2s), ratings, search, and watchlists in a responsive PWA.
- Optimized for <200ms API responses, <3s frontend load; secured with JWT and rate limiting.
- Deployed via GitHub-Firebase CI/CD; live at ai-movie-recommendation-engine.web.app and fizu.pythonanywhere.com.

AI Symptom Analyzer - Professional Medical AI Platform

github.com/faizanshoukat5/Ai-symptom-analyzer

- Built a full-stack AI Symptom Analyzer using React, TypeScript, FastAPI, and Python, integrating multiple biomedical models for clinical assessment.
- Implemented AI features including Biomedical NER for entity extraction, BioGPT and ClinicalBERT for analysis, urgency scoring (1-10 scale), and severity classification.
- Delivered user features like real-time symptom input, interactive result cards, entity recognition, and recommendations in a responsive medical-grade UI.
- Ensured privacy with local processing, no data storage; optimized for real-time results with HIPAA considerations and secure API handling.
- Deployed on Firebase; live at ai-symptom-analyzer.web.app; includes API docs, testing, and contributing guidelines.

EDUCATION

BS Computer Science

University of Lahore • Lahore, Pakistan • 2026 • 3.4

- Won a hackathon by leading a team to build a full-stack web app with React, Node.js, and MongoDB, focusing on responsive design and scalable backend. I developed core features, optimized performance, and presented to judges, earning recognition for innovation. Deployed multiple full-stack projects on AWS, enhancing my skills in JavaScript, APIs, and web frameworks.

Fsc Pre.Eng

The Crescent College • Lahore, Pakistan • 2022 • A+

Matric

Crescent Model Higher Secondary School • Lahore, Pakistan • 2019 • A+

SKILLS

Front-End: JavaScript, React, Next.js, HTML, CSS, TypeScript, responsive design
Back-End: Node.js, PostgreSQL, Python, Express.js, RESTful APIs, Firebase
AI/ML: AI, machine learning, CNN models
DevOps & Tools: Git, AWS, Docker, CI/CD
Development Practices: system architecture, performance optimization, Agile development, unit testing

AI/ML: AI, machine learning, CNN models, Python, TensorFlow, PyTorch, scikit-learn, data preprocessing, model evaluation, deep learning, neural networks, natural language processing, computer vision
