AROOJ FATIMA

AI Engineer

Email | Github | Kaggle | LinkedIn | Website | ☎ 03470468422

PROFESSIONAL SUMMARY

I am an AI Engineer at Corvit Networks with experience in building intelligent AI systems, including career recommendation bots, AI-driven feedback analysis, and voice-enabled assistants. I have worked on Retrieval-Augmented Generation (RAG) pipelines, LLM fine-tuning using Hugging Face and PyTorch, and scalable AI deployment using MLOps workflows. With a strong foundation in deep learning and NLP, I design end-to-end AI solutions that combine research-driven methods with practical, production-level implementation.

CORESKILLS

- **Programming:** Python, SQL, TensorFlow, Langchain, LangGraph, CrewAi
- **Skills:** NLP, GenAI, LLMs (Gemini, OpenAI, Llama, Falcon), Machine Learning, MLOps
- **Tools:** Git, Docker, Jira, Hugging Face
- **Deployment:** Django, Flask, Streamlit, AWS

PROFESSIONAL EXPERIENCE

Ai Engineer | Corvit Networks — Nov 2025 — Present

- Developed the AI module for the **Prime Minister Youth Program (PMYP)**, including an intelligent bot that suggests personalised career roadmaps and job opportunities based on user profiles by integrating data from PMYP and other platforms. Also implemented an admin-side AI analytics system to analyze comments and feedback, identify sentiment trends, highlight gaps, and generate improvement suggestions and quality reports.
- Built an AI assistant for a **Campus - Learning Management System (LMS)** that supports voice commands to navigate system modules (e.g., attendance, grading) and provides real-time insights on dynamic data such as pending assignments, upcoming events, and subject-wise grades.

Data Scientist | DataWorld | *Project Collaboration Program* — Jan 2025 — April 2025

- Build a Time series model for Credit Card using Facebook Prophet.
- Performed FIFA Exploratory data analysis by handling large data from the Database, including result predictor and defensive pressure.
- Analyzed heart disease data to identify key risk indicators like cholesterol, blood pressure, and age.
- Worked on Credit Card Fraud detection.

TEACHING EXPERIENCE

Junior Lecturer | UMT — Sept 2025 — Feb 2026

- I was actively involved in delivering lectures, conducting lab sessions, and assisting students in the course.
- I also contribute to preparing teaching resources and facilitating practical learning experiences

Teaching Assistant, Natural Language Processing (NLP), OS & DBMS | UMT — Oct 2024 — July 2025

- Assisted in NLP and Database concepts and supported project work using Python (NLTK, TensorFlow).
- Enhanced practical NLP skills and learned to debug model architectures and optimize algorithms.
- Guided students in OS (process scheduling, memory management) and graded assignments/projects.

EDUCATION

Bachelor of Software Engineering (BSSE) — 2021-2025
University of Management and Technology *3.62/4.0 CGPA*

Intermediate (F.S.C)
Punjab Group of Colleges *96%*

Matriculation (Science)
BISE Lahore *95%*

CERTIFICATIONS

- Generative AI Engineer |Kaggle
- Google Data Scientist | Udemy
- Certified Python Developer | PFTP
- LSTWSTC'25 (Lahore Section Young, WIE, Sight & Technical Chapter Congress) | IEEE

PROJECTS

LegalAi.Pak | FYP | UMT
• Developed LegalBot, an AI-powered legal assistant specializing in Pakistan's legal system, capable of analyzing laws/acts, summarizing judgments, and assisting in legal document drafting.
• Engineered a comprehensive web application providing lawyers with a platform to create and manage professional profiles and connect with potential clients.
• Implemented a dedicated case management workspace featuring real-time client communication, milestone tracking, and secure legal document sharing.
• Designed and integrated a legal Q&A forum within the platform to foster knowledge sharing and community discussion among legal professionals.
Tools/Tech: Python, OpenAI API, LangChain, GTTS, Whisper, Pinecone, Flask, ReactJS, ExpressJS, SQL

SmartShop.Ai | Multi-Agent | Github Link | *Capstone Project (Kaggle GenAi Course)*
• Developed ShopSmart AI, an intelligent recommendation system that personalizes online shopping by predicting products customers are likely to purchase using machine learning.
• Engineered a multi-agent AI architecture with specialized agents for search, review, and analysis to automate product research and generate data-driven insights.
• Implemented a 3-layer RAG pipeline for review scraping, vector embedding, and AI-powered summarization to deliver comprehensive product analysis with sentiment.
• Built and deployed a full-stack application with a Streamlit frontend, featuring interactive data visualizations and a low-latency voice interface for seamless user interaction.
Tools/Tech: CrewAi, Whisper, Render, Gemini

INTERNATIONAL HACKATHONS

Hackathon: ***The Internet of Agents*** | Certificate

Sonic_Guide.Ai | Multi-agent | Github Link
• Developed an AI-powered platform generating personalized audio tours for any global location.
• Engineered a multi-agent system to create and narrate dynamic, thematic content.
• Built a full-stack application with Streamlit, integrating real-time web search to deliver accurate, immersive user experiences.
• Designed the complete architecture, orchestrating specialized AI agents for architecture, history, culinary, and culture.
Tools/Tech: Python, OpenAI Agents, GPT 4o, TTS, Streamlit

Hackathon: ***Co-Creating with GPT5*** | Certificate
Medical Chatbot | GenAi | Github Link
• Developed an AI-powered medical chatbot capable of providing preliminary disease diagnosis and treatment suggestions.
• Leveraged a specialized medical knowledge base to deliver accurate and relevant healthcare information.
• Implemented a responsible AI framework to ensure safe, reliable, and ethical medical guidance.
• Engineered the full application lifecycle, from concept to deployment, creating a scalable tool for healthcare assistance.
Tools/Tech: GPT3.5, Pinecone, Langchain, and Flask, AWS EC2, ECR (Docker), and GitHub actions(CI/CD).

AWARDS & SCHOLARSHIPS

Merit-Based Scholarship (90% Tuition Fee Waiver) – Awarded by the University of Management & Technology on academic performance.
Dean Award _ On scoring 3.93 SGPA in Fall 2023.
