Muhammad Haroon Farooqi

ID: 35302-3843648-9 | **Date of birth:** 02/12/2003 | **Place of birth:** Lahore, Pakistan | **Gender:** Male | **Phone number:** (+92) 3259770915 (Mobile) | **Email address:** mharoonf1@gmail.com | **LinkedIn:** https://www.linkedin.com/in/haroon-farooqi-807175274/ | **Git Hub:** https://github.com/ShaixhFH | **Address:** 19/1 A Canal Gardens, Lahore, Pakistan (Home)

ABOUT MYSELF

Mobile Developer

An **iOS developer and mobile app enthusiast** with hands-on experience building high-quality, user-focused applications for iOS and cross-platform environments. Proven ability to design and implement scalable mobile solutions, from responsive UI/UX with SwiftUI and UIKit to performant React Native components. Equally comfortable optimizing native iOS app performance and integrating cross-platform features for seamless functionality. Leverages a comprehensive tech stack (Swift, SwiftUI, UIKit, React Native, Firebase, CoreLocation) to deliver polished, high-impact mobile products efficiently and reliably.

WORK EXPERIENCE

IOS DEVELOPER INTERNSHIP – VIRTUAL UNIVERSITY SOFTWARE HOUSE – 20/10/2024 – 30/08/2025 – LAHORE, PAKISTAN

Completed a one-year internship as an **iOS Developer**, working on the design, development, and maintenance of iOS applications using Swift, SwiftUI, and UIKit. Contributed to building real-world mobile applications, implementing UI/UX designs, integrating application logic, and optimizing app performance.
Gained hands-on experience in mobile app architecture, debugging, testing, and feature implementation while collaborating with team members to deliver functional and user-focused iOS solutions.
Key Technologies:
Swift, SwiftUI, UIKit, Xcode, iOS SDK, REST APIs, Git

REACT NATIVE DEVELOPER – DEVSITIO – 01/06/2024 – 30/09/2024 – LAHORE, PAKISTAN

Developed and maintained a **Real Estate mobile application** for buying, selling, and renting properties.
Implemented core features including **property listing, property details, search, and filters** for better user experience.
Worked on **user authentication, navigation, and responsive UI design** using **React Native**.
Collaborated with the team to **debug, test, and optimize performance** of the application.
Gained hands-on experience in **mobile app development lifecycle** from design to deployment.

EDUCATION AND TRAINING

01/05/2021 – 10/09/2025 Lahore, Pakistan
BACHELOR OF SOFTWARE ENGINEERING Virtual University Pakistan

Website https://www.vu.edu.pk/

LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s): **ENGLISH**

SKILLS

iOS developer | Programmazione in Swift/SwiftUI | Swift (SwiftUI, UIKit) | iOS Development: Swift, Objective-C | RESTful api | Object-Oriented Programming | ReactNative app development | H TML 5, CSS 3, ES6-7 | Github

PROJECTS

10/02/2025 – 10/04/2025

Intelligent Ceiling Estimator & Record Management (Mobile App)

Developed a mobile-based **Reactor Ceiling Cealing Estimator and Record Maintenance** application to digitize ceiling measurement, cost estimation, and documentation workflows. The app automates the calculation of ceiling material and labor costs based on user-input dimensions and ceiling types, reducing dependency on manual estimation and paper-based records.
Implemented structured data entry, automated cost computation, and digital project record storage to support accurate tracking of multiple ceiling projects. Integrated dynamic forms, date pickers, and urgency indicators to align with real-world contractor and real estate workflows.
Designed backend-style workflow logic for project creation, updating, and historical record maintenance, improving transparency, traceability, and professional project management.
Tech Stack:
Swift, SwiftUI, UIKit, Auto Layout, UIScrollView, Local Storage
Outcome:
Improved estimation accuracy and reduced turnaround time for ceiling project quotations while enabling organized digital record maintenance.

15/05/2025 – 25/06/2025

GeoQuest – Quiz-Based Educational Game (Mobile App)

Developed ***GeoQuest***, a quiz-based educational mobile game designed to enhance users' **geographic** knowledge through interactive and engaging gameplay. The game features multiple quiz modes focused on countries, **capitals**, **maps**, and **geographic** facts, providing a fun and practical learning experience.
Implemented structured quiz logic, scoring systems, and progressive difficulty levels to support continuous learning and replayability. Integrated map-based components and dynamic UI flows to improve user engagement and provide visual context for geographic questions.
Designed clean and responsive user interfaces with robust state management to ensure smooth gameplay, accurate answer validation, and consistent performance across different quiz types.
Tech Stack:
Swift, SwiftUI, MapKit, Game Logic Modules, Local/Firebase Storage
Outcome:
Delivered an engaging educational game that improves geographic learning through interactive quizzes, resulting in higher user engagement and repeat gameplay.
