+92 303 0695862

## PROFILE SUMMARY

Final-year Software Engineering student at UET Lahore with hands-on experience in Artificial Intelligence, Machine Learning, and Deep Learning. Skilled in developing and deploying AI-driven applications, generative AI systems, chatbots, and agentic AI using LangChain, LangGraph, and vector databases like FAISS with RAG pipelines. Proficient in web scraping using Selenium, Playwright, BeautifulSoup, and Requests. Experienced in full-stack development with Python (Flask), Spring Boot, and Node.js, along with CI/CD workflows. Adept at data preprocessing, visualization, and building scalable, intelligent solutions.

## EDUCATION

**University of Engineering and Technology, Lahore (New Campus)** **Dec 2022 – Present**
*Bachelor of Science in Software Engineering -8th Semester*
***CGPA: 3.61***

**Govt Graduate College Garh Maharaja More, Jhang** **Oct 2020 – Oct 2022**
*Pre-Engineering*

**Govt Higher Secondary School Garh Maharaja, Jhang** **Mar 2018 – Sep 2020**
*Matriculation in Science (Biology)*

## TECHNICAL SKILLS

- **AI/ML Side:** AI/ML/DL Model Training | Data Cleaning | EDA | LangChain | LangGraph | FAISS Vector DB | RAG Pipeline | API Integration | CI/CD | Flask
- **Web Scraping:** Selenium | Playwright | BeautifulSoap | Requests
- **Frontend:** HTML | CSS | JS | React.js | Bootstrap
- **Backend:** Spring Boot (Java) | PHP |Node.js (basic)
- **Databases:** MySQL
- **Languages:** C++ | C# | C | Java | Python | PHP
- **Expertise In:** OOP | DSA | Database

## PROFESSIONAL EXPERIENCE

**AI/ML Engineer — *TechBuzz Software House*** **June 2025 – Feb 2026**
• Worked on AI/ML model training, data preprocessing, and integration of generative AI and RAG-based systems.
• Developed and optimized chatbot and agentic AI workflows using LangChain and LangGraph.
• Collaborated with the development team to deploy AI-powered features into Flask-based applications.

**Front End Developer** **May 2024 – June 2024**

- **Crystal Solution Software House**: work as junior developer in React.js.

**Teaching Assistant – Object-Oriented Programming Lab**
*University of Engineering and Technology (UET)* Lahore (New Campus) **Jan 2025 – May 2025**
• Assisted students in understanding core OOP concepts and guided them in lab assignments and coding tasks.
• Supported lab sessions, evaluated student work, and helped with debugging C++ code.

## PROJECTS

### WEB PROJECTS

**Forms Project** – Interactive Web Forms **Jun 2024**

- Created a web interface with different maintenance forms according to requirement using React.js.
- Link: https://form-s-project.vercel.app/

**Mastermind** – An Interactive Web calculator **Jun 2024**

- Developed calculator using React.js.
- Link: https://react-calculator-psi-seven.vercel.app/

**TextUtils –** Text Processing Web App **Jun 2024**

- Built a React.js application with features like word count, case conversion, copy text, count lines, and dynamic theme modes.
- Link: https://text-utils-zeta-peach.vercel.app/

**AWIT Shope** – An E-Commerce Website **Dec 2024**

- Developed a full-stack e-commerce website using HTML, CSS, Bootstrap 5.0 (frontend) and Spring Boot (Java) with MySQL for data storage.
- **GitHub:** https://github.com/waseem0296/E-Commerce-App-AWIT-Shop-

**AWIT Shope** – An E-Commerce Website **April 2025**

- Developed a full-stack e-commerce website using HTML, CSS, Bootstrap 5.0 (frontend) and PHP with MySQL for data storage.

## AI/ML PROJECTS

**AI Recruitment Automation System – End-to-End Applicant Screening & Interview Scheduling** **Jan 2026**

• Built an AI system to automatically screen, qualify, and decline job applicants based on experience, certifications, and job criteria.
• Implemented AI voice calls to ask preset questions, record and transcribe answers, and generate a short evaluation report.
• Automated interview scheduling by checking calendar availability and confirming slots with applicants and recruiters.
• Integrated all updates and reports directly into Hireology for a fully hands-free hiring process.
• Tech: Python, AI Voice Agents, Speech-to-Text, Text-to-Speech, LLM Integration, Hireology API.

• GitHub Link: Private – Client Project

**Airbnb Property Intelligence & Owner Data Extraction Agent** **Nov 2025**

• Developed a Python-based automation agent to process Airbnb property links and extract listing data.
• Integrated Google Street View API to retrieve property coordinates, nearby house images, and similarity analysis.
• Connected third-party skip tracing platforms (Apollo / Batch Skip Trace) to fetch verified owner contact details.
• Automated end-to-end workflow to compile extracted data into structured JSON files and deliver results via n8n engine.
• Tech: Python, REST APIs, Google Street View API, Web Automation, JSON Processing, n8n Integration.

• GitHub Link: Private – Client Project

**AI Doctor Assistant – Voice & Vision Based Context-Aware Medical Support** **Sep 2025**

• Developed a multimodal healthcare assistant supporting text, voice, and medical image inputs for diagnostic suggestions.
• Implemented speech recognition (Whisper) and text-to-speech (gTTS) for natural doctor-like conversations.
• Enabled context-aware dialogue with Groq's LLaMA model for consistent, medical Q&A sessions.
• Built live chat interface with Gradio to display conversation history and support multimodal interactions.
• Tech: Python, Gradio, Groq LLaMA, Whisper, gTTS, Computer Vision.
• GitHub Link: https://github.com/waseem0296/AI-Doctor-Assistant-Voice-and-Vision-Based-Context-Aware-Medical-Support

• Linkedin video Link: https://www.linkedin.com/in/waseem-abbas-gudara-622768264/recent-activity/all/

**Smart Medical Diagnosis Assistant** **Sep 2025**

• Built an AI-powered virtual doctor assistant with text, voice, and emotion-aware interactions.

• Integrated LLMs (Groq + Gemini) for medical Q&A, speech recognition for voice input, and text-to-speech for natural responses.
• Implemented emotion detection to adapt responses based on patient's emotional tone.
• Designed modular architecture with Flask backend and Streamlit frontend for scalable development.
• Tech: Python, Flask, Streamlit, Groq API, Gemini API, Speech Recognition, TTS, Emotion Detection.
• GitHub Link: https://github.com/waseem0296/Smart-Medical-Diagnosis-Assistant

**LangGraph AI Chatbot Agent System** **August 2025**
• Developed a modular AI agent system with LangGraph, FastAPI backend, and Streamlit frontend.
• Integrated multiple LLMs (LLaMA 3, Mixtral, Gemini Flash) with dynamic switching between Groq & OpenAI APIs.
• Enabled real-time web search using Tavily and custom system prompts for flexible AI behavior.
• Designed modular architecture to extend with new tools, APIs, and logic.
• Tech: Python, LangGraph, FastAPI, Streamlit, Groq API, OpenAI API, Tavily.
• GitHub Link: https://github.com/waseem0296/LangGraph-AI-Chatbot-Agent-System
• Linkedin video Link: https://www.linkedin.com/in/waseem-abbas-gudara-622768264/recent-activity/all/

**RAG-Based AI Assistant for JSON Documents** **August 2025**
• Built a Retrieval-Augmented Generation (RAG) assistant to answer queries from structured JSON document chunks.
• Implemented FAISS vector database with HuggingFace embeddings for similarity search and context retrieval.
• Integrated Groq-hosted LLMs with LangChain and custom prompts for accurate, source-cited answers.
• Developed chat-based interface with Streamlit for easy interaction.
• Tech: Python, LangChain, FAISS, HuggingFace Transformers, Groq API, Streamlit.
• GitHub Link: https://github.com/waseem0296/RAG_Based_AI_Assistant_For_Specific_Json_File

**Andaaz Chatbot – Food Delivery Website (RAG-Based AI)** **August 2025**
• Developed an AI chatbot for a food delivery website with backend in Python (Flask) and frontend in React.
• Deployed frontend on Vercel; explored backend deployment options with Render & Railway.
• Implemented RAG pipeline with FAISS vector search and Groq's LLaMA 3 for domain-specific query answering.
• Tech: Python, Flask, React, FAISS, LLaMA 3 (Groq), Vercel, Render, Railway.
• GitHub Link: https://github.com/waseem0296/Andaaz-chatbot

**AI-Chatbot-That-Answers-Questions-Using-Website-Data (RAG-Based)** **July 2025**
• Built an AI-powered chatbot that crawls a website (DigitalUsman.pk), indexes data, and answers queries using only site content.
• Implemented RAG with FAISS vector search and Groq's ultra-fast LLaMA 3 model for accurate, domain-specific responses.
• Developed REST API with Flask and interactive chat UI with Streamlit.
• Tech: Python, Flask, FAISS, LLaMA 3 (Groq), Streamlit.
• GitHub Link: https://github.com/waseem0296/AI-Chatbot-That-Answers-Questions-Using-Website-Data-RAG-Based.git
• Linkedin video Link: https://www.linkedin.com/in/waseem-abbas-gudara-622768264/recent-activity/all/

**Gemini 2.0 AI Integration – Flask Web App**
*AI Web Interface Project* **May 2025**
• Integrated Gemini 2.0 API into a custom Flask app for real-time AI interactions.
• Built front-end with HTML/CSS & managed backend API calls in Python.
• Tech: Gemini API, Python, Flask, HTML, CSS.
• GitHub Link: https://github.com/waseem0296/Gemini-2.0-AI-Integration-Flask-Web-App

**Flu Shot Learning – Vaccine Prediction Model**
*DrivenData Competition* **May 2025**
• Built ML model to predict H1N1 & seasonal flu vaccination using survey data.
• Ranked among top performers on DrivenData leaderboard.

• Competition Link: https://www.drivendata.org/competitions/66/flu-shot-learning/submissions/

**ML Model Training – Iris & Boston Datasets**
*Data Science Practice Projects* **April 2025**
• Trained and evaluated ML models on Iris (classification) and Boston Housing (regression) datasets.
• Applied data preprocessing, feature scaling, and used models like KNN, Decision Tree, and Linear Regression.
• Tech: Python, Scikit-learn, Pandas, Matplotlib.

• GitHub Link: https://github.com/waseem0296/ML-Model-Training-Iris-Boston-Datasets

**Student Depression Prediction – ML Model**
*Mental Health Data Project* **March 2025**
• Trained ML model to predict student depression levels using survey-based dataset.
• Performed data cleaning, feature selection, and applied classification algorithms.
• Tech: Python, Pandas, Scikit-learn, Seaborn.

• GitHub Link:https://github.com/waseem0296/Student-Depression-Prediction-ML-Model/

**Breast Cancer Prediction – ML Model**
*Health Data Analysis* **Oct 2025**
• Built a classification model to predict breast cancer using the Wisconsin dataset.
• Applied preprocessing, feature scaling, and trained models like SVM and Random Forest.
• Tech: Python, Scikit-learn, Pandas, Matplotlib.

## SECURITY PROJECTS

**Secure File Sharing App – AES Encryption**
*Information Security Project* **May 2025**
• Developed a Flask-based web app to securely share documents, images, audio, and video files.
• Implemented AES encryption in Python to ensure end-to-end data security.
• Built a user-friendly front end using HTML and CSS.
• Tech: Python, Flask, AES, HTML, CSS.

• GitHub Link: https://github.com/waseem0296/Secure-File-Sharing-App-AES-Encryption

## HONORS & AWARDS

**Efx Code Clash from ASME 1st Position Certificate** **April 2025**

- Awarded with a lot of cash price for getting first position in Efx Code Clash.

**Codek 2.0 1st Position Certificate** **Nov 2024**

- Awarded with cash price for getting first position in Codek 2.0.

**Code Clash Participation Certificate** – ITEC **Feb 2024**

- Awarded for placing Top 10 at ITEC's Code Clash.

**Code Fest 4.0 Participation Certificate** – Code Fest **Dec 2023**

- Awarded for placing Top 15 at Code Fest 4.0.

**Gold Medal in Marathon – 2000 m** **Oct 2023**
• Awarded a gold medal for winning the 2000 m marathon at the UET Sports Gala.
