Professional Summary

AI Automation Engineer with 2 years of experience building production workflows and conversational AI for commercial and government clients. Expertise includes n8n-based CRM/email automation, LLM-powered RAG chatbots (web and WhatsApp), and AI voice/video generation pipelines with reliable integrations and monitoring.

Key Highlights

- Delivered automation solutions across sales ops, customer support, and public-sector citizen services using n8n orchestration and API integrations.
- Built LLM and RAG assistants for enterprise knowledge access, focusing on controlled generation and retrieval quality.
- Implemented WhatsApp-based complaint intake and routing flows for government stakeholders, enabling structured submissions and status updates.

Core Skills

Automation & Integration: n8n, workflow orchestration, webhooks, REST APIs, OAuth, schedulers, retries, logging, error handling
LLMs & RAG: prompt engineering, Retrieval-Augmented Generation (RAG), embeddings, vector search, document ingestion/chunking, evaluation
Chatbots & Business Automation: WhatsApp complaint intake, web chatbots, intent routing, CRM pipeline automation, meeting scheduling, personalized email replies
Engineering: Python, JSON, Git, SQL basics, Linux, system design fundamentals

Professional Experience

Software Engineer (AI Automation) | Bilytica | 2024 – Present (2+ years)

- Delivered end-to-end n8n automations for CRM and email operations (lead capture, deal creation, meeting scheduling, follow-ups, and personalized auto-replies), reducing manual sales tasks.
- Built resilient integrations across CRM, email, calendars, and internal services using webhooks and REST APIs, with retries, failure alerts, and audit-ready logs.
- Shipped conversational assistants for public-sector stakeholders, including Khorfakkan Municipality (Sharjah) chatbot for a Dubai Government stakeholder and a Faisalabad Government WhatsApp complaint bot spanning 8 departments with structured routing.
- Implemented AI media and marketing automations including avatar video generation with voice cloning, UGC ad variation generation, and automated social media handling workflows.

Selected Projects

PayPeople RAG Knowledge Assistant - RAG chatbot for internal HR/policy FAQs with ingestion and retrieval-driven responses (custom build, live data).
Faisalabad Government WhatsApp Complaint Bot - Complaint intake, categorization, assignment, and status updates across 8 departments.
Khorfakkan Municipality Chatbot (Sharjah) - Citizen query and service guidance assistant with structured data capture and routing.
AI Voice Receptionist - Dental Clinic - Voice-based receptionist workflow to capture intent/details and route calls to staff.
Avatar Video Generator with Voice Cloning - Automated script-to-video generation using voice cloning for avatar-led marketing content.
UGC Ads Creator & Social Media Automation - Automated creation of UGC-style variations and social media posting/handling workflows.
CRM & Email Automation Suite (n8n) - Meeting scheduler, lead/deal automation, and personalized email responder workflows.

Education

B.Sc. Software Engineering, Minhaj University Lahore | Nov 2021 - Sep 2025

Relevant Coursework: Artificial Intelligence, NLP, Deep Learning, Data Structures, OOP, DBMS, Operating Systems, Python Programming Fundamentals
