ABEERA SALMAN

Address: Central Park, Lahore **Phone:** (+92)-312-7222816
LinkedIn: https://www.linkedin.com/in/abeera-salman-948a2a3ba/ **Email:** abeera.salman999@gmail.com

AI & ML | React Developer

Computer Science graduate with strong foundations in software development, machine learning, and web technologies. Experienced in developing predictive models using LSTM and FinBERT and building responsive web applications with React. Passionate about solving real-world problems through data-driven and scalable solutions.

Education

Bachelor of Science in Computer Science (BSCS)
University of Central Punjab, Lahore
2022 – 2026 | CGPA: **3.91**

FSc Pre-Medical
Punjab Group of Colleges, Wazirabad
2019 – 2021 | Marks: **999/1100**

Matriculation (Science)
Govt. S.K. Girls High School, Wazirabad
2018 | Marks: **1007/1100**

Work Experience

BolTech Solution | AI Engineering Intern(***Aug 2025 – Oct 2025***)

- Gained foundational experience with AI tools such as Claude AI and LangChain, including basic prompt engineering techniques.
- Learned data preprocessing, basic model optimization, and gained exposure to MCP servers and cloud-based AI infrastructure.

BolTech Solution | Web Development Intern(***Aug 2024 – Oct 2024***)

- Developed hands-on experience with front-end technologies including HTML, CSS, JavaScript, and React.js.
- Assisted in building responsive web components and learned best practices in UI development and version control.

Projects

FinTrend – Stock Market Prediction (FinBERT & LSTM)
Tech Stack:

- **Frontend:** React.js
- **Backend:** Node.js
- **Languages:** Python, JavaScript
- **Libraries & Tools:** FinBERT, LSTM, TensorFlow/PyTorch, Pandas, NumPy

Developed a financial forecasting system combining NLP and deep learning to predict stock trends.

- Performed sentiment analysis on financial news using FinBERT.
- Built an LSTM time series model for stock price prediction.
- Integrated sentiment and numerical data to improve accuracy.
- Conducted data preprocessing, feature engineering, and model evaluation.

Diabetes Prediction (Machine Learning)

- Built a classification model to predict diabetes risk using patient health data.
- Applied preprocessing, feature selection, and evaluated performance using accuracy and confusion matrix.

Sentiment Analysis Tool (C++)

- Developed a rule-based tool using string processing and lexicon scoring.
- Classified text as positive, negative, or neutral with modular, efficient code.

Hangman Game (C++)

- Created a console-based game with random word selection, user input handling, and game state management using fundamental data structures.

Technical Skills

- **Programming & Development:** C, C++, Python, JavaScript, React.js
- **AI Development Tools:** Cursor, Claude Code, KIRO
- **Design & Modeling Tools:** Figma (Prototyping), StarUML (UML Modeling), Microsoft Word (Documentation)
- **Languages:** English – Fluent | Urdu – Native | Punjabi – Native

Interpersonal Skills

- **Proactive Problem Solver:** Enthusiastic about learning and tackling complex challenges with a resilient "can-do" mindset
- **Effective Communicator & Team Player:** Collaborates well in dynamic environments and adapts quickly to new technologies

Core Competencies

- **Programming & Development:** Programming Fundamentals, Object-Oriented Programming, Python, JavaScript, React.js
- **Data & Databases:** Data Structures & Algorithms, SQL & Relational Databases
- **Software Engineering:** Software Engineering Fundamentals, Front-End Web Development, Basic Debugging & Code Testing
- **Problem Solving & Analytical Skills:** Problem Solving, Logical Thinking

Leadership Activities

- Participated in university VIS tree plantation and environmental awareness campaigns
