# SAJJAD HUSSAIN

AI Developer

+923071875089 • engnrsajjad54@gmail.com • LinkedIn • Github • Model Town, Lahore.pk

## Summary

**AI Developer** with **2+ years** of hands-on experience architecting and deploying production-grade LLM applications, autonomous agents, and intelligent automation systems. Specialized in building high-performance APIs using **Python, FastAPI, Django, Flask, LangChain, and LangGraph** with proven expertise in **RAG architectures, prompt engineering, and LLMOps**. Delivered end-to-end AI solutions that reduced operational costs by 80% and processed 1,000+ daily transactions. Demonstrated leadership in mentoring development teams, driving technical architecture decisions, and integrating enterprise-scale AI models (OpenAI, Claude, and Gemini) into production environments. Recognized for transforming complex business requirements into scalable, secure, and intelligent systems.

## Experience

### Xconsol — Lahore, Pakistan

AI Developer — 10/2024 - Present

- **Architected 5+ FastAPI microservices and multi-agent systems** (LangGraph, CrewAI) with **<200ms latency, 99.5% uptime**, handling **50,000+ daily requests** and reducing manual workflows **70%**
- **Integrated GPT-4, Claude 3.5, Gemini + RAG pipelines** (Pinecone, Chroma), boosting engagement **45%**, cutting response times **60%**, achieving **92% accuracy**, and automating **15+ processes** (120+ hours saved monthly)
- **Trained custom ML/OCR models** processing **1,000+ invoices/day at 90%+ accuracy**, slashing costs **80%** ($15K+ saved), mentoring 3 developers, and reducing bugs **35%** via 30+ code reviews

### Einnovention Software Solutions — Lahore, Pakistan

Software Developer — 06/2021 - 09/2021

- **Led cross-functional workshops** resolving technical bottlenecks (reducing resolution time **15 hours/month**), implemented **2 frontend best practices** (component modularity, state management), cutting production bugs **25%**, and contributed to **5+ feature releases** with 100% sprint commitment

## Skills

**AI & Machine Learning:** Python • Machine Learning • Deep Learning & Neural Networks • Natural Language Processing • Large Language Models (OpenAI GPT-4, Claude 3.5, Gemini) • LangChain • LangGraph • RAG Systems • Prompt Engineering • Computer Vision • OCR (Tesseract) • TensorFlow • PyTorch • Scikit-learn • LLMOps

**Backend Development & APIs:** Python (FastAPI, Django, Flask) • RESTful APIs • Microservices Architecture • MVC Architecture • Multi-Agent Systems • Workflow Automation (n8n) • Model Deployment

**Database & DevOps:** PostgreSQL • MySQL • SQL Optimization • NoSQL (MongoDB) • Vector Databases (Pinecone, Chroma) • Docker • Git/GitHub • CI/CD Pipelines • Pandas • NumPy • Matplotlib • Plotly • Seaborn

**Frontend & Integration:** HTML5 • CSS3 • JavaScript • React • RESTful API Integration

**Soft Skills:** Cross-Functional Collaboration • System Architecture Design • Problem-Solving • Presentation • Teamwork

## Education

### Government College University Faisalabad — Sahiwal, Pakistan

Bachelor of Science in Computer Science | GPA: **3.0** / 4.0 — 09/2019 - 09/2023

- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Data Mining, Software Engineering, Web Development, Object-Oriented Programming, Data Structures, Compiler Design, Operating Systems

## Projects

### Xconsol Agents

Project link — 05/2025 - 09/2025

- **Engineered full-stack autonomous AI agent platform** with multi-workflow orchestration, multi-source knowledge base (text, videos, URLs), and **95% relevance accuracy** in context-aware responses.
- **Developed embeddable chat widgets** deployed across **20+ client websites**, handling **5,000+ monthly interactions** with real-time LLM responses.
- **Tech Stack:** Python, FastAPI, LangChain, RAG Pipelines, OpenAI API, Vector Databases (Chroma), PostgreSQL, Clerk Auth, RESTful APIs, Docker.

### Invoice Data Extraction System 09/2025 - 11/2025

- **Trained custom AI/ML model** with multi-layered OCR pipeline (Tesseract + regex + ML) achieving **90%+ accuracy** and **98% consistency** across diverse invoice formats.
- **Engineered intelligent fallback system** processing **1,000+ invoices daily** in production, eliminating third-party API dependency and saving **80% operational costs.**
- **Tech Stack:** Python, FastAPI, Tesseract OCR, OpenAI GPT/LLMs, RESTful APIs, Data Cleaning & Preprocessing, Docker, Microservices Architecture.

## Courses and Certification

- Python Fundamentals **on GreatLearning**
- Advanced AI Agents using n8n on Udemy
- Full stack generative and Agentic AI with python on Udemy
- Complete Agentic AI Bootcamp With LangGraph and LangChain on Udemy
- FastAPI on Freecodecamp

## Languages

Urdu/ English Proficient ●●●●○
