SEHAR KASHIF

AI Engineer and Developer

I am an IT student dedicated to learn and grow, with a keen interest in machine learning and AI solutions and real-world problem solving as well as web development and mobile application development. I am a fast learner always ready to learn anything new to improve myself.

WORK EXPERIENCE

IT Intern: Healthwire

- Gained hands on experience with Artificial Intelligence and Website development.
- **Projects:** Object Detection, OCR image or voice to text converter, Mask detection with AI, Live webcam detection of objects and mask/without mask, Twitter pages development, Real Estate AI Chatbot.

Technologies:
React, Flask, Html, Css, Java Script, Bootstrap, AI pretrained Models, Node Js, Google Colab, Ollama, Sql Database, Firebase.

23/6/2025 Lahore

SKILLS

C++ | Python | Dart | html/css/javascript | PHP | Assembly | Boot Strap | Oop with C++,Dart and Python | Data Structures | React Framework | Django Framework | Flutter Framework | HIVE | Figma | Advance DL and ML ALgorithms | SQL,Firebase | Numerical Analysis and Computing Algorithms | Data Manipulation

PERSONAL PROJECTS

Tick Tack Toe Cosole Based Game (02/2023 - 03/2023)
- A Cosole Based Game Coded in C++ With all Basic fucntionalities of the Tick Tak Toe

Hotel Management System (08/2023 - 08/2023)
- A C++ Cosole based hotel reservation and Customer management system The
- application was design with classes and object oriented programming

Hangman Console Based Game (10/2023 - 11/2023)
- A Cosole based Game with Console graphics and predifined variables

Social Media Management System with Sql and Python (02/2024 - 03/2024)
- A SQL lite and Python based web application
- The application handled request to store and retrieve data on demand with an interactive UI and to manage social Media

Intellectual Dressing Website (04/2024 - 04/2024)
- Website Programmed in python with React Framework and SQl for the database The
- application consisted of design animations coded with react

Travel Planning Application (03/2025 - 04/2025)
- Application Coded with Dart and Flutter framework
- The application used Firebase to store and retrieve user data The app
- also implimented Google APi key for Location Data

Glam And Revam (04/2025 - 05/2025)
- We Modeled our old project from React Framework into the Django Framework and presented it.

Trove Store (04/2025 - 05/2025)
- Transformend a Html and css based application into a Boot Strap equipped application
- Transformed the application into a PHP project and implimented sql and Apache server to create a web application

Trained Multiple Ai Models with Different Algorithms (04/2024 - 05/2024)
- Trained 8 different ML algorithms with consisting of ANNs
- We predicted Customer churn Using Multiple different AI algorithms

CERTIFICATES

Advance Web Development (10/28/2025)

HTML 5 Application Developement
Worked on Advanced Web Dev Projects Based on PHP, Boot Strap, SQL and apche server.

FYP (Final Year Project) (11/12/2025)

Life Management Skills (2023)

LANGUAGES

Urdu
Full Professional Proficiency

English
Professional Working Proficiency

INTERESTS

Artificial Intelligence | Web Development | Video Editing | Logic Development | Designing | Cooking | Documentries | Time Pieces

EDUCATION

- **Bachelor of Information Engineering Technology**
  Superior University Main Campus

  2022-2026

  FSc Pre Engineering
  Superior College Canal Campus
  2020 – 2022
