ABOUT ME

I am a Bachelor of Computer Science student and freelance tutor with six months of experience teaching programming and AI to learners ranging from high school to postgraduate level. My teaching covers core topics such as Probability, Linear Algebra, Linear and Logistic Regression, Decision Trees, Neural Networks, and Reinforcement Learning, alongside Java and Python programming with a focus on OOP and data structures. Fluent in English, Urdu, and Hindi, with basic German and Arabic. I am Passionate about both Coding and AI.

EDUCATION AND TRAINING

01/04/2025 – CURRENT Berlin, Germany

BSc computer science Srh university of applied science

Website https://www.srh-university.de/de/ | **Field of study** Computer use , Information and Communication Technologies (ICTs) not further defined | **Level in EQF** EQF level 3

SKILLS

programming | python | basic java | AI | teaching | Microsoft Powerpoint | Good listener and communicator | Motivated | Creativity | Team-work oriented | training models | Organizational and planning skills | hard woking

WORK EXPERIENCE

self employed Berlin, Germany

Tutor

01/08/2025 – Current

Artificial Intelligence & Machine Learning Instruction

- Designed and delivered a comprehensive curriculum covering foundational to advanced AI/ML concepts.
- Foundational Mathematics: Taught Probability & Linear Algebra as the mathematical basis for AI.
- Core Machine Learning: Instructed key algorithms including Linear Regression, Logistic Regression, Naive Bayes, and Support Vector Machines (SVM), with emphasis on the Bias-Variance Trade-off.
- Advanced Supervised Learning: Guided students through ensemble methods including Decision Trees, Random Forests, and Boosting techniques.
- Unsupervised Learning: Covered essential topics such as Clustering and Dimensionality Reduction (e.g., PCA).
- Deep Learning: Introduced Neural Networks fundamentals and provided an introduction to the Keras framework.
- Specialized AI Areas: Instructed cutting-edge topics including Reinforcement Learning, Graphical Models, Distributed Learning, and Online Learning/Multi-armed Bandits.

Programming & Software Engineering Tutoring

- Provided expert tutoring in Java programming, building a strong software engineering foundation.
- Focused on Object-Oriented Programming (OOP) principles, design, and best practices.
- Taught core Data Structures and Algorithmic Problem-Solving to enhance computational thinking and coding interview preparedness.

Pedagogical Approach & Additional Experience

- Employ Structured Sessions, breaking down complex technical topics into digestible, modular learning units.
- Full instruction of A-Level Computer Science, covering both theoretical concepts and practical implementation for high school students.
