Imtiaz Ahmad

Machine Learning Engineer

Phone: +92 305 1237291

Email: imtiazahmad0a@gmail.com

LinkedIn: https://linkedin.com/in/imtiaz-ahmad

Professional Summary

Machine Learning Engineer with hands-on experience designing and deploying end-to-end machine learning solutions including predictive analytics, time-series forecasting, natural language processing, and data-driven automation. Skilled in Python, SQL, Scikit-learn, TensorFlow, and PyTorch. Experienced in building scalable data pipelines, data preprocessing, feature engineering, and deploying models using AWS SageMaker. Passionate about using artificial intelligence to solve real-world business problems.

Technical Skills

Programming: Python, SQL

Machine Learning: Scikit-learn, TensorFlow, PyTorch, Deep Learning

Data Analysis: Pandas, NumPy, Matplotlib

Cloud & Deployment: AWS, AWS SageMaker

Tools: Jupyter Notebook, VS Code, Google Colab, Excel

Methodologies: Agile, Data Preprocessing, Model Evaluation, Feature Engineering

Professional Experience

Machine Learning Engineer – Freelance (Fiverr & Upwork)

April 2021 – Present (Remote)

• Developed end-to-end machine learning pipelines including data preprocessing, feature engineering, model training, and evaluation.

• Built predictive analytics and time-series forecasting models for multiple business applications.

• Implemented machine learning algorithms using Python, Scikit-learn, TensorFlow, and PyTorch.

• Deployed machine learning models using AWS SageMaker for scalable real-time predictions.

• Performed exploratory data analysis and data visualization to generate business insights.

Machine Learning Project Contributor – Beacon Capital Management (Intuity AI)

June 2025 – Oct 2025 (Remote)

• Contributed to the development of machine learning models and predictive algorithms.

• Prepared and managed training datasets and data pipelines.

• Developed source code and scripts for model training and evaluation.

• Produced technical documentation and specifications for machine learning systems.

Key Projects

Fake Review Detection System

• Built an NLP-based classification model to detect fake product reviews.

• Used TF-IDF feature extraction and machine learning classification techniques.

Brain Age Prediction Model

• Developed a machine learning model to estimate brain age using predictive algorithms.

Water Demand Forecasting System

• Built a time-series forecasting model to predict future water demand using historical data.

AI Scoring System

• Developed an automated scoring system using machine learning models for predictive analysis.

Education

BSc Computer Systems Engineering – Islamia University of Bahawalpur, Pakistan (2018 – 2022)

Certifications

Python for Data Science – Coursera, Machine Learning Techniques – Mind Luster
